NOMADO GROUP

STRATEGIC PARTNERSHIP PROPOSAL FOR KOIMA

BRIDGING EURASIAN BIO-RESOURCES WITH KOREAN MANUFACTURING

Gemini Notebook

An Integrated Global Management Ecosystem

Nomado Group is an international holding company that operates scalable, export-ready businesses by leveraging technology, in-house production, and operational excellence. We run our supply chains as highly regulated systems, entirely eliminating the friction and risk typically associated with cross-border trade.

Premium Nutraceutical Asset: Freeze-Dried Goat and Mare Milk

DATA TELEMETRY

Our flagship bio-resource is a 100% natural, highly soluble powder sourced from pristine Eurasian environments.

Processed exclusively through advanced lyophilization (freeze-drying), this gentle extraction perfectly preserves fragile biological structures, enzymes, and micro-nutrients that traditional thermal processing destroys.

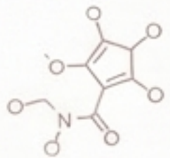

Gemini Notebook

The Bio-Active Composition Architecture

DATA TELEMETRY

Pillar 1: Probiotic Matrix

Rich in naturally occurring *Lactobacillus casei* and *Bifidobacterium bifidum*.

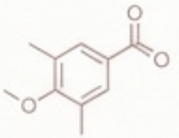

DATA TELEMETRY

Pillar 2: Immune & Digestive Modulators

Gentle protein structures that seamlessly support healthy gut microflora, normal digestion, and natural immune defense.

DATA TELEMETRY

Pillar 3: Essential Micro-Nutrients

A highly concentrated, digestible profile featuring Calcium, Phosphorus, Magnesium, Potassium, Sodium, Iron, Zinc, alongside a robust vitamin complex (A, B1, B2, B6, B12, D, E).

Gemini Notebook

Uncompromising Safety and Export Compliance

Nomado completely de-risks the international supply chain for our Korean partners. We manage **the entire regulatory lifecycle** before the product ever leaves the origin facility.

Certified Export-Ready

- Full microbiological safety testing verified.
- All required Kazakhstani export certifications fully obtained.
- Unadulterated source purity guaranteed.
- Industrialized quality control governed by Nomado's proprietary management systems.

Gemini Notebook

Flexible Integration Models for the Korean Market

Pathway A: Bulk Raw Material Export

Application: Supplying premium, bulk freeze-dried powder directly to Korean local OEM/ODM manufacturers.

End-Use: Encapsulation, dietary sachets, functional powder blends, and nutraceutical supplements.

Pathway B: Direct Finished Goods Import

Application: Supplying finished, packaged dietary preventative products ready for retail shelves.

End-Use: Direct consumer distribution across premium Korean wellness and grocery channels.

Gemini Notebook

Strategic Match-Making Request to KOIMA

We respectfully request the Korea Importers Association's expertise in facilitating introductions between Nomado Group and targeted Korean enterprise partners.

Dietary Raw Material Importers

Sourcing premium, compliant bio-active ingredients from Eurasia.

01

Health Functional Food (HFF) Manufacturers

Korean OEM/ODM facilities looking to expand their probiotic and nutritional product lines.

02

Retail Wellness Distributors

Networks focused on distributing premium preventative dietary products to Korean consumers.
