To maintain our future ...

In the current process where the environment is rapidly polluted and reaching to a point threatening the natural life and the humanity, and where the global warming has reached to significant dimensions; it lies on our hands to interfere with the situation and to save our future.

The sustainable environmental and energy policies established in this context make us feel their importance more and more every day in economic and social development and this process also accelerates improvement of the environment-friendly technologies. In addition, in the current process where the global warming is threatening the world and where dehydration will be one of the most important problems of the future, renewable-clean energy and ecological production carry great importance.

Today we are aware of the damage given to the environment by burning the fossil fuels used as the most important energy source and its negative impacts on human health. People live intensively dependent on energy and thus, the requirement for development of new techniques for using more environment-friendly and renewable energy resources such as bio-gas, sun, wind, water and geothermal energy increases.

An environment investment of Euro 35 billion by the year 2014

It is very important for Turkey to exhibit and promote environment-friendly technologies. Turkey is aiming at achieving an environmental investment of Euro 35 billion by the year 2014. It is planned to intensify these investments in the fields of solid wastes, hazardous wastes, waste water and renewable energies.

It is also envisaged to make an additional investment of Euro 30-35 billion for the period of 2014-2023. It is projected to realize 20% of the investments by the central Government, 42% of which by local administrations, 15% by the private sector and 23% by the funds and it is expected that the local administrations will initiate an investment of Euro 1 billion in 2008.

Environmental Technologies Fair ÇET'08 is in Izmir

Second session of the Environmental Technologies Fair shall be organized on 8th-11th May 2008 in Izmir. Environmental Technologies Fair, the first session of which was held in Kocaeli, will be moved to Izmir. Besides better transportation and accommodation opportunities, its fairground bearing the European standards, having a larger hinterland as the third largest city of Turkey and the demands of the participants of the first session in this regard have lead to organize the fair in Izmir and in May instead of June.

Conference on Alternative, Renewable Energy Resources and Water Problems

The main topic of the fair, which will be held in Culture Park, has been identified as "Conference on Alternative, Renewable Energy Resources and Water Problems" that is a topic on the agenda of the world. Meetings, seminars and workshops will be organized on this issue with the participation of the related institutions and the academicians.

Following ÇET'07 ...

Kocaeli Environmental Technologies Fair, which was held on 5th-9th June 2007 in order to bring together the international organizations producing environmental rehabilitation systems and other products and services related with the sector, local business partners, representatives of the public and private sector, the scientists and everyone following the developments in environmental technologies, was very successful although it was the first session. The "Environmental Investment and Cooperation Conference" held simultaneously with the fair was organized with the participation of the domestic and foreign scientists, representatives of the industrial institutions, mayors and the officials of the municipality in parallel with the program determined by the scientific committee consisting of several scientists in Turkey.

The fair was held on an area of 5500 m² with the participation of 108 companies, 7 of which are from abroad and 20 of which are the Turkish representatives of foreign companies. The fair was visited by 3400 visitors, 1200 of whom were professionals.

59% of the respondents of the questionnaire applied to the participating companies of the fair mentioned that they achieved their goals, and 79% of them reported that they want to participate in the fair to be organized in the following year again.

Products to be Exhibited in the Fair

Environmental Health and Systems: Water technologies and equipments, treatment and recycling of the drinking water, processed water and waste water, infrastructural and sanitary installation technologies, pipes and equipment, chemicals and equipment of pool treatment, waterproofing products, channel cleaning systems and products.

Alternative and Renewable Energy Systems: Wind, hydraulic, geothermal, solar energy, hydrogen energy systems, fuel cells and biological fuel.

Recycling Systems: Collection, transportation, recycling and elimination of the wastes

Collection Systems for Hazardous Wastes: Waste collection units, elimination services

Emissions: Emission decreasing technologies, measurement-monitoring and control and laboratory technologies systems

Institutions Serving for the Municipalities: Construction machinery, technology and telecommunication, fire and security systems, traffic, road safety and their equipment, on-board equipment, service vehicles and commercial vehicles, urban planning, landscape and urban furniture, sports and leisure time facilities and equipment.

Environmental Projects of the Municipalities

Infrastructure, Drilling, Survey, Research Technologies and Services

Project Commitment and Implementation Services

Environment-friendly Products

Environmental Guidance Services

Banking and Finance Services

Publications, Associations, Universities and Public Research Institutions

Visitor Profile

• Mayors • Directors of environment and other related divisions of the municipalities • Factory owners • Managers of Public Institutions • Purchasing Officials • Managers of Industrial Zone • Contractors • Farmers Associations • Cooperatives • Managers of Consultancy Organizations • Managers of Project Offices • Managers of the institutions and the organizations related with the issue • Managers of Banks and Financial Institutions • Engineers • Technicians • Academicians • Students • Publishers

Visiting Hours: 11.00 a.m -19.00 p.m

Participation Fee and Terms of Payment (per sqm)

0-50 m² : \$ 100 + VAT (18%)
51-250 m² : \$ 90 + VAT (18%)
251 m² and over : \$ 80 + VAT (18%)

Standard stand services are included in the participation fee.

Standard Stand

A standard stand includes carpet, front plate, lighting, 1 table, 3 chairs and internet connection.
