From the brink of mankind and throughout History, the Holy Land of Israel has been conceived, respected and renowned by many of the World's Religions as the main Holy Landmark in which History itself occurred. The constantly increasing yearning of peoples all around the World, to experience and connect with their Historical roots, to step along side and on the same stones, soils and paths where their ancestors once stepped while they established the roots of their religion through their journeys, has brought masses of believers, from nearly every existent country and religion in the World, to visit and step in these same paths and sites, for a spiritual experience possible only in the Holy Land of Israel.

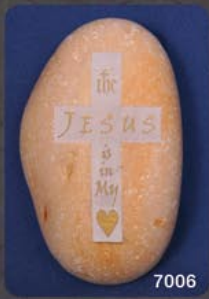

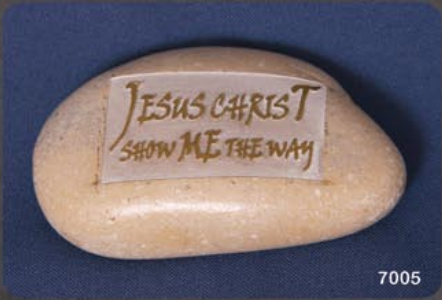

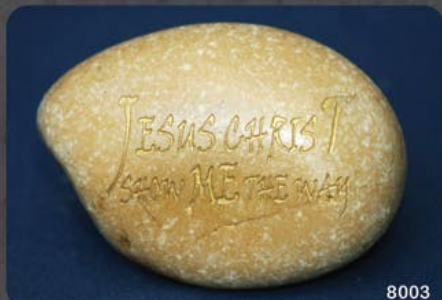

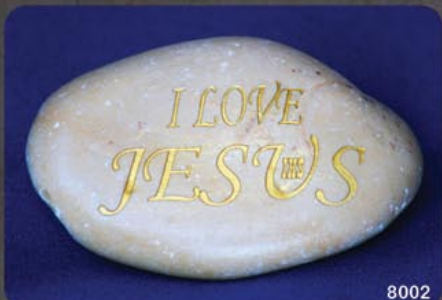

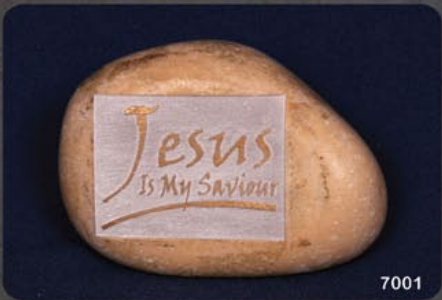

The authentic and serene biblical beauty of Jerusalem, Nazareth, the Sea of Galilee and many other Holy Sites in the Holy Land of Israel, trace back in time to the era in which the roots of Christianity were sown in the sacred stones and soils of these magnificent places. These same stones and soils served a major Historic role, embedding the paths on which the "Footsteps of Jesus", his disciples and many other biblical giants stepped on while they made their historic journeys all over and through the Holy Land of Israel.

For the creation of our beautiful and unique products, we make use of raw materials which have been produced and carved by nature itself.
