Dare change

The Ophyto brand rests on a solid experience of face and body care. Ophyto proposes natural products with a very high technicality and very elaborate beauty treatments.

We offer a tool that is complete and performing: a specific «retail» and «cabin» formulation, and a high concentration in biotechnological active constituents, vegetal ingredients (essential oils, cereals, vitamins...) and minerals (colored clays, oligo-elements).

Ophyto suggests a very different and most successful experience in cosmetology.

Holistic* treatments for all

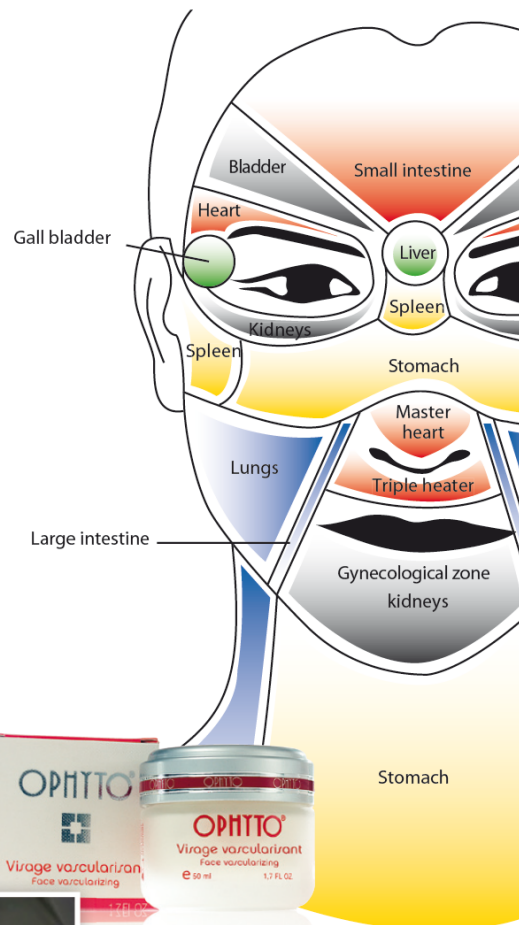

The Ophyto method is based on Traditional Chinese Medicine. It enables to intervene at the origin of an aesthetic problem.

Our energetic treatments are based on the principles of a good balance of all five elements: Wood, Fire, Earth, Metal and Water.

Any energetic lack of balance results in an aesthetic plainness, signaled by the scalp, face and silhouette.

In order to restore this balance, Ophyto makes use of aromatherapy, reflexology, digito-pressure and aesthetic drainage.

* This method is founded on the notion of the global nature of the human being: physical, emotional, mental and spiritual.
