

Sharing has never been easier.

FLUCARD PRO

With its own built-in Wi-Fi, the revolutionary Flucard® Pro allows you to share precious moments directly from your camera to any smartphone or Wi-Fi enabled device.

Now go on and share your masterpiece anytime anywhere.

Plug and Play

No installations involve. Just pop a Flucard® in and have instant access to its features.

P2P Sharing

Wirelessly share photos and videos between Digital Still Cameras (P2P) or other Flucard® enabled devices (camcorder, digital photo frame etc).

Sharing On-the-Move

Previewing, selecting and downloading the pictures onto your Laptops, Tablets and Smartphones wirelessly while on-the-move.

You can configure your Flucard® through these mobile devices too.

Server Upload

Upload your photos wirelessly to the Flucard Portal or a server of your choice to free memory space and continue snapping.

You can then access them anywhere in the world with a web surfing device.

Mobile Apps

Enhance & Expand your Flucard® experience with our latest apps for the iPhone, iPad and Android platform.
