

ChM Ltd. Lewickie 3b, 16-061 Juchnowiec Koscielny, Poland

# ChM<sup>®</sup> *The passion of creation. The joy of helping.*

ChM Ltd. (Lewickie, near Bialystok, Podlaskie Voivodeship, Poland) is a company with 100% of Polish capital. It is a leading manufacturer of implants and instruments for orthopedics and traumatology highly regarded by clinicians from almost all continents. This is one of the only three Polish companies of this profile operating in the domestic market.

The company was established in 1981 by Mr. Mikolaj Charkiewicz, who currently acts as Chairman of the Supervisory Board. The position of Chairman of the Board, since August 2013, has been occupying by his son – Mr. Michael Charkiewicz. The Charkiewicz Family is the only owner of the company.

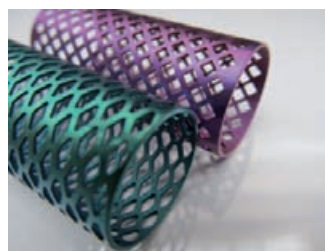

ChM Ltd. is an excellent example of a company that has experienced the following stages of its development - starting from a family business to becoming an advanced company with a complex structure, which employs nearly 400 people.

At the core of the enterprise activity lies a stable foundation based on the systematic development and implementation of new technologies. The company develops and implements original solutions that are used in the design and manufacture processes of the next generation, modern and safe medical devices.

With ChM products, surgeons have helped to restore the health and fitness of thousands of patients around the world. The orthopedic clinics and hospitals are indirect recipients of the company products. The company has an extensive distribution network in over twenty countries.

The ChM offer consists of over 30,000 different items with such flag products as:

- locking intramedullary nailing systems: CHARFIX<sup>®</sup> and CHARFIX2<sup>®</sup>, ChfN<sup>®</sup>
- systems of spine stabilization: CHARSPINE<sup>®</sup>, IDS<sup>®</sup>
- locking plates system ChLP<sup>®</sup>
- external fixator CHARSTAB<sup>®</sup>
- dynamic stabilizer DSB / DSK

*Currently, the company is exploring the possibilities of using the polymeric materials for the production of bioresorbable implants.*

*Almost from the beginning, ChM interacts with both representatives of the medical and scientific environment and the research centers. It focuses on continuous development. The Company extends its machinery with more innovative devices which results in ability to offer high quality products with the excellent features.*

*To achieve this, the company is taking care of the permanent technical and organization development in all aspects of its business. Each element of the creation process, from design through production and ending on distribution, is proceeded accordingly to precise procedures and with use of modern facilities. The procedures applicable in the company are in compliance with the requirements of ISO.*

*The company's laboratory conducts researches of new products and performs the tests for new technological solutions. Taking care of the safety of products – they are subject to restrictive quality and endurance tests.*
