

LUCEK
HYDRAYLICALLY POWERED

LUCEK weed trimmer

LUCEK trimmer is designed for mowing weeds in the rows of trees and bushes. It can significantly reduce or even eliminate the use of herbicides in orchard production. This lowers the cost of operations and facilitates ecological cultivation. There is a possibility to customize the LUCEK trimmer to be mounted on the three-point hitch in the back of the tractor.

Technical data LUCEK

| Working width: | 2.00 m |
| Length: | 1.76 m |
| Height: | 0.81 m |
| Weight: | 110 kg |
| Mowing width: | 0.67 m |
| Cutting height: | 30 mm |
| Efficiency: | 0.5-1.0 ha/h |

JAGODA
MOST POPULAR MODEL

JAGODA 1.6m / 1.8m mover

Orchard mower JAGODA is produced in version 1.6 (meters of working width). Version 1.8 is produced on request. These are the most popular models, perfect for both orchards and currant/berry fields. The cutting element is in fact a set of four rotating blades and one blade installed on the side of the body. It allows grinding of mown mass and also grinding of branches up to 30 millimeter wide. The mower shouldn't be used on fields sloped more than 12 degrees or covered in large stones.

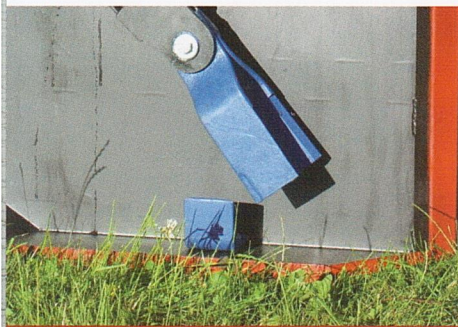

Technical data JAGODA
