ABOUT US

The Noris company has been in the business of processing forest mushrooms, fruits and vegetables since 1992.

We have two factories in Poland with four IQF tunnels with total production capacity of 8000 kg per hour. In both factories we can store 7500 tons. The product is processed according to customers' order and his requirements.

Thanks to the experience we have gained the company managed to perfect the processes of sourcing, transporting and storing raw materials. We had worked out processing methods that guarantee high quality as well as exceptional and incomparable taste and nutritional value. Those have been reflected by continuous growth of interest in our products, both locally and abroad.

ABOUT US

Our products are nowadays exported to many countries around the world. We owe most of our success to our highly qualified staff and reliable business partners. We are self-sufficient in sourcing raw materials which are obtained through a well developed network of collection points for wild mushrooms and fruits located throughout the country.

We treat each order individually and are always eager to meet a particular need of our customers. We are open for new ideas and innovations.
