

Otmet®

*OTMET – 70 years of shoe
production*

About company

*OTMĘT – 70 years
of shoe production.*

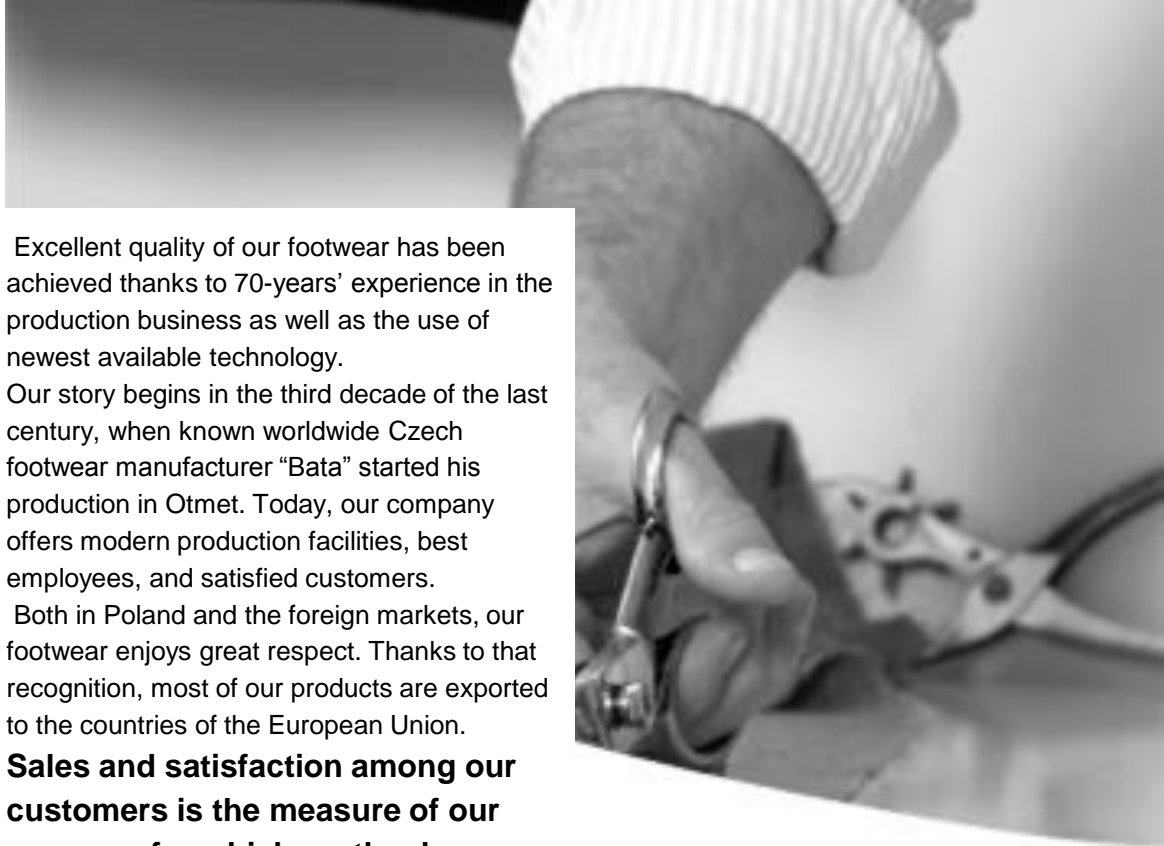

Excellent quality of our footwear has been achieved thanks to 70-years' experience in the production business as well as the use of newest available technology.

Excellent quality of our footwear has been achieved thanks to 70-years' experience in the production business as well as the use of newest available technology.

Our story begins in the third decade of the last century, when known worldwide Czech footwear manufacturer "Bata" started his production in Otmet. Today, our company offers modern production facilities, best employees, and satisfied customers.

Both in Poland and the foreign markets, our footwear enjoys great respect. Thanks to that recognition, most of our products are exported to the countries of the European Union.

Sales and satisfaction among our customers is the measure of our success, for which we thank you very much.

What makes us different?

- ➔ *Hand-made products*
- ➔ *Natural materials*
- ➔ *Innovative technology*

Unique flexiblow technology

Walking in our shoes is the meaning of true comfort.

Do you know why?

Unique flexiblow technology strongly influences the increase of comfort as well as the use and durability.

We produce the shoes only from natural leather, which gives perfect fit and allows the foot to “breathe.”

Antifungal and antibacterial inserts, FRESH FEET.

Germicidal agent from the Swiss company Sanitized, protects feet from bacteria and fungi.

It is durable and safe antibacterial protection for people who care about foot hygiene. Charcoal, which is a component of the dermatologically tested insert, effectively absorbs unpleasant foot odor.

Hand-made and years of experience

Each pair of shoes is hand made by professionals with many years of experience.

As a result, it is possible to take care of each detail and to obtain such high quality of our shoes.
