DR.DERM

PROFESSIONAL

- ✓ Medical inspired
- ✓ Hypoallergenic
- ✓ Pharmacy Cosmetics

Line suitable for pharmacies, drugstores and beauty areas based on biologically active and functional ingredients: Zinc, Evermat, Sepitonic M3, Marine Collagen, Hyaluronic Acid with low molecular weight.

Invivo and Invitro Tests

DR.DERM

PROFESSIONAL

Active ingredient:

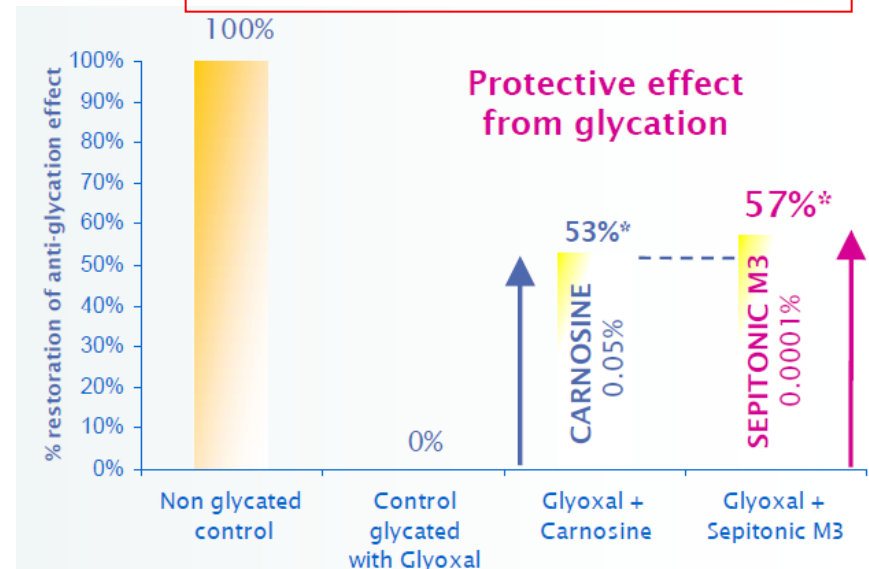

SEPITONIC M3 – multimineral chrono-stimulant for recharging the cells stimulating cell respiration process new Zink formulation, Ac.net, Fucogel
Multimineral cocktail – Zn, Mg, Cu

SEPITONIC M3 effectively fight the skin aging. Structural proteins such as collagen, elastin remain functional longer and add strength and elasticity to the skin, and it becomes less susceptible to aging.

The results of **IN VIVO test on 30** volunteers showed an increase of almost 10% of the partial pressure of oxygen to the skin after two hours of treatment. After 28 days, 76% of participants show visible effects, deep wrinkles decreased by 7% on average and skin texture is improved by 5%.

Main active ingredients in the serums:

**NEW:
Bio-Zinc**

IN VIVO and IN VITRO Tests for active ingredients

PENTAVITIN® is highly effective regulator of moisture, which operates in the driest areas, where traditional moisturizing agents lose their effectiveness

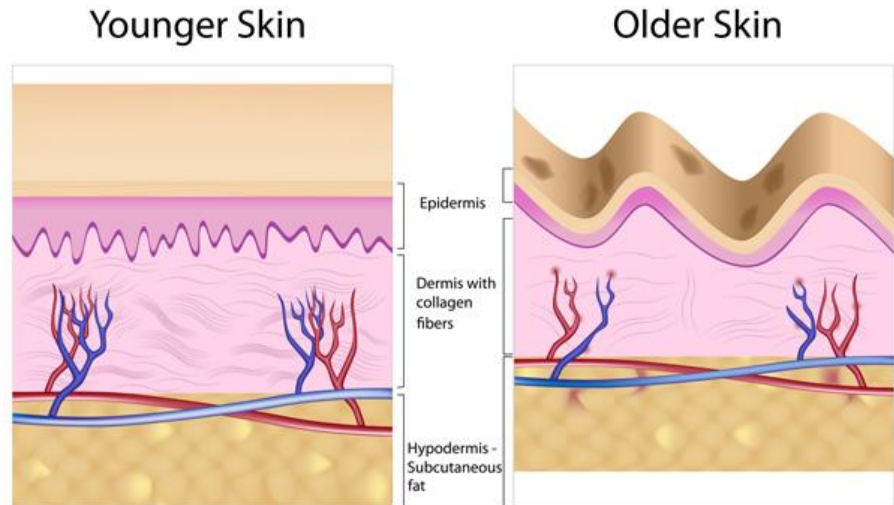

AQUAXYL™ improves water reserves of the skin and reduces the water loss.

ProfiDerm

Professional

Main active ingredients in Creams and Fluids:

Tens'Up™ is an innovative active ingredient with lifting and firming effect and with immediate effect. It combines its lifting action with anti-aging effect as it increases collagen synthesis. There is a double action for immediate improvement of skin appearance.

Traditions and innovation

Patented active ingredients with clinically proven effects at the cellular level.
