

tranquileyes™  
Eye Hydrating Therapy

**Tranquileyes** eye hydrating therapy is a revolutionary, doctor recommended system used to naturally hydrate dry, tired eyes, reduce eye puffiness and create complete darkness to enhance relaxation and sleep.

See studies by doctors <http://www.eyeeeco.com/index.php?file=studies>

**Chronic Dry Eye TE Kit - best-selling kit for dry eye sufferers**

**Chronic Dry Eye TE Kit** includes everything a user needs to receive the full benefits of the tranquileyes system. The kit includes a set of the Blue Instant thermoeyes allowing for both mild and intense Moist Heat Therapies (dry eye relief) and Cold Therapies (puffiness).

The Moist Heat Therapies use heat to help loosen the oils we need to slow evaporation of our natural tears. The increased humidity created reduces the evaporation of natural and artificial tears while wearing the goggle, creating a soothing environment for the cornea.

Kit includes: One tranquileyes goggle with foam for sensitive skin, one spare set of foam, one set Blue Instant thermoeyes, travel sack, net dry bag and 1.0 oz. anti-bacterial Cleanser for Foam.

Other kits and various accessories are available.

\*Tranquileyes Moist Heat therapies use heat and warm water to help open the meibomian glands and increase the relative humidity around the eye. The meibomian glands secrete oils that help slow down the evaporation of natural tears. The increased humidity helps slow evaporation of any moisture naturally created (tears) or topically applied to the eyes (artificial tears, ointments, Restasis™).
