## Collaboration Offer

CONSULTING FOR WOOD S.R.L is a private factory or producer working in the automotive industry since 2013. The factory is running in two different locations. One factory is located in Brad, Hunedoara County and the second one is located in Abrud, Alba County. In both locations, we currently have a total of 225 employees and are constantly growing the productivity and number of employees. As now, our factory has partnered with multinational companies producing automotive components such as Takata, and Key Safety Systems. Autoliv Romania is our current supplier. In our factory we dress or coat polyurethane steering wheels in leather, sort, and inspect airbags components.

Dressing or coating steering wheels with leather is considered a difficult task in the automotive industry because it requires totally manual work and careful attention to detail at each stage: deburring, sanding, oiling, finishing, positioning and closing seam, control 100%, control 200%. Until the end stage, the leather is going through majors modifications due to the high temperature. Also, our quality standards of the products are raised to the highest level.

Below there are a couple of snapshots from both of the factories. In Brad, Hunedoara County (Factory 1) is divided into distinct compartments that process different steering wheels. Currently, we manufacture two types of steering wheels for Volkswagen Passat and Volkswagen TT. In the past, we also worked for Jaguar, Peugeot, and Fiat.

Factory 1:

CONSULTING FOR WOOD S.R.L can fulfill orders of any type of steering wheels and our employees have more than 12 years' work experience. We believe that team work and professionalism makes us successful and efficient.

As a result of high quality work standards, at the beginning of 2015 we opened a second factory in Abrud, Alba County. There, we have 160 employees and the main goal of this facility is to sort auto components for airbags. In order to provide the highest quality, our employees are required to attend a three month long training at the Autoliv Plant, Lugoj, Timisoara County.

The snapshot below is from the newest location in Alba County. At this location, the components are provided to us and all the components are cut differently according to each project. Here, our employees sort and inspect each piece. Our current volume is about 600,000 components per day with an increase in the coming months to 800,000 units per day.

Factory 2:

In the same location, we opened another section just for dressing or coating steering wheels in order to finish orders in time, about 1,000 steering wheels per day. The two snapshots below are from our newest section of dressing or coating steering wheels:

We are looking for the expansion of other projects in the automotive industry or others and we can produce everything related to manual work. We benefit from the following:

- We have an available warehouse with a total area of 10,000 m<sup>2</sup> of which 8,000 m<sup>2</sup> production space and 2,000 m<sup>2</sup> workshop maintenance and administrative offices with related utilities: electricity installed capacity of 1,600 kw, water supply, sewerage, land for 20,000 m<sup>2</sup> which can be used for parking, warehouses, and other facilities. Below is a snapshot of the warehouse which can be used for production:

- We have enough young and qualified workforce, approximately 4,100 personnel ready to work. This personnel is available within a radius of 25 kilometers, which it's the main asset of this area.

- In addition, the local authorities are very receptive and willing to provide all the support necessary to create new jobs.
- The location is very convenient and near big cities: 124 km from Cluj-Napoca, 65 km from Alba Iulia, 135 km from Sibiu and 209 km from Timisoara.

Our goal is to form long term collaborations and partnerships with companies wanting to develop their business in an area with high potential. We offer large workforce, stability, professionalism, and personnel trained in various trades and a huge production hall. We are open for every type of business because we are more than prepared in manufacturing industry. We would like to share the space or sell the production hall and established a strong partnership that will definitely last in this area.

We will be more than happy to provide you with more information and answer any questions you might have. We are looking forward to hearing from you soon!

Sincerely,

Cosmina Achim Marcus

Administrator
