UNIQUE STYLE AND THE HARMONY OF NATURE

UNIQUE STYLE  
AND THE HARMONY  
OF NATURE

Origin

OUR ADVENTURE  
WITH WOOD AND  
WATER BEGAN  
WITH BUILDING  
BOATS AND  
YACHTS

---

UniqueWood Design is a family company which roots reach the year 1979. We have started building wooden boats and yachts. Since that time we have developed top level carpentry and boat building technology. The wood working experience, modern coating technology and design creativity brought us to the idea of company that we run today. It is growing dynamically and sets new goals to achieve.

Wood  
**MAGICAL  
MATERIAL**

Wood is the most sophisticated natural material to work with. It is heterogeneous different manufacturing techniques bring out unique textures and colours. Thanks to the great variety of species, the spectrum of possibilities seems infinite. If we also bear in mind the natural warmth, soothing touch and outstanding thermal insulation characteristics we get the truly perfect material. Material which has its own, independent character.

Craft

# COMPUTER, LATHE AND THE JACK PLANE

—

Man has been working with wood from thousands of years and despite of fast development of technology, some things are still best to be done by hand, according to the old ways. In our workshop we make use of the latest technological achievements – advanced design software, modern tools and adapted high-tech solutions. At the same time we use chisels, traditional lathe or hand sand paper. Arranging of wooden elements so that they make beautiful, harmonious composition is not something that we would like to let computers do.

Impregnation

## IMPREGNATION MAKES THE DIFFERENCE

---

Our impregnation method has been adopted from yacht hull building. Multilayer coating is fully waterproof while having an excellent mechanical and chemical resistance. For the bathroom purposes we needed to make some crucial modifications though. After many efforts - endless consultations with subject specialists and building of the brand new technological backup, we managed to work out the ultimate impregnation method that we use today. Aside from reliability it provides an aesthetical effect which satisfies even most demanding clients.

Design and ergonomy

„A DESIGN IS NOT  
FINISHED UNTIL  
SOMEBODY IS  
USING IT”

BRENDA LAUREL

—  
Carpenters goal is to bring out the beauty contained in wood itself. Designs are meant to be simple, harmonious, coherent. Our main priority is client's comfort – we make extensive ergonomics analyses. While making projects to measure we often learn from our clients. We work out new technologies allowing to integrate some new solutions into projects.
