

NEPAL INVESTMENT SUMMIT 2019

29-30 MARCH, KATHMANDU

GOVERNMENT OF NEPAL

#investinnepal

RIGHT HONORABLE PRIME MINISTER
MR. K P SHARMA OLI

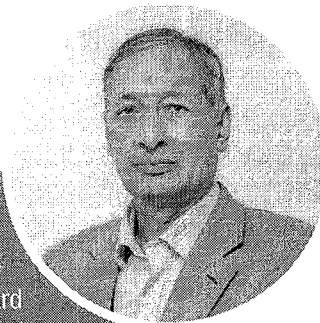

Nepal is a unique investment destination, given its diverse resources, huge market access across the borders and government's single-most priority on development. With accomplishment of political stability, strong commitment to good governance and improving infrastructure, Nepal is looking forward to rapid investment growth in several potential areas of industry and infrastructure. As the focus of the current government is on economic prosperity, very much aligned with the vision of "Prosperous Nepal: Happy Nepal", I consider **Nepal Investment Summit 2019** as a distinctive opportunity to realize the potentials of the country as well as of the investors.

Nepal values the role of foreign investment including technology and skill transfers to embark on high economic growth trajectory in its journey towards prosperity. The government is fully committed to facilitate and create investment friendly environment for all who have already invested and/or are exploring opportunities to invest in Nepal.

We heartily welcome you to invest in Nepal's future along with yours.

HONORABLE MINISTER FOR FINANCE
AND, CONVENOR, NEPAL INVESTMENT SUMMIT 2019

DR. YUBA RAJ KHATIWADA

The role of investment, be it domestic or foreign, is crucial to achieve high economic growth and realize Nepal's aim of becoming a middle-income country by 2030. As part of our endeavor toward establishing Nepal as a promising investment destination,

Nepal Investment Summit 2019 is an opportunity for us to exhibit the range of policy, structural and procedural reforms undertaken by the government to create a conducive environment for investing and doing business in Nepal.

The focus of the Summit is also to showcase a list of potential projects that could be offered to investors for development. We wholeheartedly welcome you to participate in the event and further explore the untapped potentials, thereby becoming our partner to achieve the goals of shared prosperity.

BACKGROUND

The political transition that engulfed Nepal for a long period of time has fortunately come to an end and the country has embarked on a new journey of rapid economic development and prosperity following the promulgation of the Constitution. Competitive multiparty democracy and liberal economic policy are among the salient features of the Constitution. With the formation of a strong government with robust popular mandate earlier this year, all our efforts are now directed towards economic transformation in the country.

As the Government concentrates its efforts on realizing the vision, "Prosperous Nepal, Happy Nepali", it recognizes the crucial role that the investment, both domestic and foreign, can play in bridging Nepal's existing capital and technological gaps. The Government has already initiated a range of far-reaching policy reforms with a view to addressing the constraints and bottlenecks that impede investment and offering the most attractive and secure investment opportunities to investors. Political stability has ensured policy stability and the Government remains firmly committed to taking further measures, commensurate with the needs and circumstances, to guarantee and maintain investors-friendly environment.

In an effort to further enhance Nepal's standing as a promising investment destination and to build on the recent encouraging developments, the Government of Nepal is organizing 'Nepal Investment Summit 2019' on March 29 -30 in Kathmandu. The Summit will bring together prominent national and

international speakers, dignitaries, policy as well as sector specific experts and, more importantly, high-level representatives of the governments.

After a gap of over two decades, the Government had organized Nepal Investment Summit 2017 to promote Nepal as an investment destination for the next decade. The Summit generated huge interest in the international community, thus helping to create a positive momentum among potential foreign investors.

This Summit, a major investment promotion initiative of the Government of Nepal, is a continuous effort and commitment to attract and encourage investment.

OBJECTIVES

The main objective of the event is to project Nepal as a favorable investment destination by unveiling potential opportunities for investment in the sector such as Energy, Tourism, Industry, Transport Infrastructure, Information and Communication Technology, and Agriculture. In addition, the Government will use this unique forum to unfold a range of policy reforms and incentives to attract investors. Moreover, the Summit will provide a platform for global investors to deepen their understanding on the investment environment and opportunities in Nepal.

FOCUS

- (a) Sharing policy reforms undertaken by the Government of Nepal
- (b) Sharing potential projects both for studies as well as for development
- (c) Receiving first-hand knowledge and feedback on policy reforms from key business players in/entering Nepal
- (d) Providing networking platform for business leaders
- (e) Encouraging public private partnership

REGISTRATION

All interested participants are kindly requested to register to receive an invitation, as the participation to the event is strictly on invitation-basis. There is no registration and participation fee.
