Barn boards

The barn board, which has passed the test of time, is much stronger and more stable than modern lumber.

The properties of a barn board can be compared with a thermal board, which changed its structure, increased its strength and improved other indicators by exposure to high temperatures in a closed chamber exposure.

Calibrated brushed board. Length 1.5m +; width 100mm +; thickness from 10mm

Calibrated brushed board. Length 1.5m +; width 100mm +; thickness from 10mm

Calibrated natural color board. Length 1.5m +; width 100mm +; thickness from 10mm
