

Dear Sirs,

We, Universal Group would like to offer you Larch lumber (sawn timber) products from Russia's Central Siberia.

We are a manufacturer of the wide range of lumber products, such as wall cladding, lining, block house, imitation of timber, and any product according to the customer's requirements.

Collaboration with my company will exclude intermediaries, speed up the negotiation process, reduce the delivery time of lumber and of course you will get the best price from the manufacturer.

The price for lumber is indicated on the terms of FCA Krasnoyarsk. Delivery cost to be calculated individually for each shipping volume of goods in high 40-feet container.

Suburban construction

The name itself, a terrace larch board, already speaks of the scope of this material. This flooring is best suited for outdoor use.

- terrace
- porch
- gazebo
- easy annexes
- landscape design elements
- ship decks

The use of ecological natural materials is becoming more and more popular, so the scope of the terrace board is constantly growing.

The bar spliced in length

No.	Product's name & dimensions				Price, EUR/USD per 1 m3	
		Thickness (mm)	Width (mm)	Length (mm)	E	B
