Innovations start with a detail

Modern technologies used for production and developed know-how enable creating future packaging. With us, every product will receive a unique solution.

There is more to our work

Packaging Materials

CERTIFICATED

In our company we have implemented a quality management system based on the norms included in the BRC Packaging and Packaging Materials system. This certificate guarantees safe packagings which has an incredible influence on the food supplied to food chain stores. Thanks to this we gain the trust of our business partners for whom the quality of the product is of utmost importance.

BRC Packaging and Packaging Materials Certificate means that each product batch is totally traceable which allows following the product through the whole product life cycle.

There is more to our work

The mark of
responsible forestry

Environment protection and great care of our surroundings are among our values. If we do not take care of our future and the future of next generations today, we may contribute to the devastation of the natural habitat. Therefore, we have become one of the companies awarded the FSC Certificate. It guarantees that our products are manufactured from trees growing in well-managed, sustainable forests and controlled resources. As a result, we contribute to the protection of the natural ecosystem by influencing positively the local community and our staff. The future depends on us!

There is more to our work

Our business partners and their success are of utmost importance to us. We care about providing the highest level of customer service. Building relationship and understanding our customers' expectations are crucial for us. We assist at every stage of the project since we believe in achieving success together.

We are proud to announce that we have been awarded a certificate of Customer Friendly Company Program.

We wish to thank you for all positive opinions which we have received.

There is more to our work

Since 2017 we have been a member of the Polish Chamber of Flexographers, which associates business entities involved in production and services using flexographic techniques.
