made of non-
woven fabrics**

www.delrus.ru

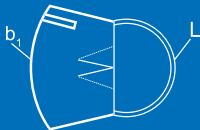

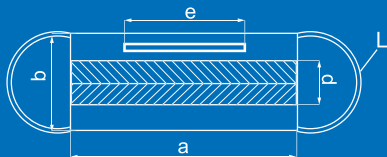

- Minimum cost 0.31 € per unit in the version with side ties and 0,34 € per unit in the version with elastic loops.
- Minimum consignment 200, 000 units (200 boxes).
- 1.3 million masks in the version with side ties and 1.8 million masks in the version with elastic loops in stock.
- Terms of payment: prepayment - 30% of the total cost, 70% - 3 banking days after shipment.
- FCA delivery terms. Urgent shipment from warehouses in Moscow.

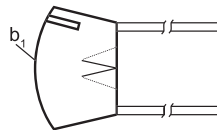

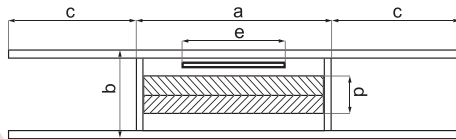

Masks are made of a three-layer non-woven fabrics (spanbond / meltblown / spanbond) and have ties or elastic loops that provide a tight fit to the face. Masks provide bacterial filtration with 95% effectiveness and good breathability.

Masks produced by Delrus Ltd are to be used as a barrier agent during the threat of infections transmitted by airborne droplets. The masks are primarily intended to reduce the risk of people contamination.

The masks fully comply with Russian technical specifications TU 32.50.50–002–00302178–2020 “Medical mask made of non-woven fabrics” and are registered as a medical product in Federal Service for Surveillance in Healthcare (registration certificate of Roszdravnadzor RZN 2020/9971).

The masks were produced in March-April 2020, with an expiration date of 3 years. All products have been initially sterilized with electron beam. Packing – 5 pieces in individual packaging (plastic bags), 200 packages in a transport box.
