

Human Medical- Herbal teas

Focusing specifically on the problem we set out to alleviate and cure.

Our tea blends are designed to provide solution to problems that affect many people. We put together several beneficial herbs found in nature, which reinforcing each other's effects, came together into a unique tea blend.

Our teas consist of a unique blend of 6-12 herbs with similar effects. Fibrous herbs are used, unlike filter formulations. This also ensures the quality of the product. Made in Hungary.

Packaging: in a transparent filter box with a UV filter and aroma, in which the essential oils remain for several years, thus ensuring the freshness of the active ingredients.

- Rheumatism, inflammation
- Brainpower increasing
- Respiratory
