

K A N D Y G S

Kandygs started with only 10 machines in 1971 but now has as many as 300 handlooms and 30 power looms housed within a number of weaving units. We also have a fully equipped dye house and a sewing unit.

Apart from our commitment to producing quality products, Kandygs supports the Handloom Industry by providing secure, fair employment and on the job training. We pride ourselves in having trained more than 300 weavers working in our units or from their own homes. These commitments add value to our products, but have also resulted in a number of national export and innovation awards. Kandygs successfully exports to Japan, Germany, United Kingdom, Netherlands, Norway, Sweden, and the Maldives.
