Trade Principles

'Thirasara' (Sustainability)

The Thirasara Collection

The products of The Thirasara Collection are made of fabric woven by rural weavers, using certified 100% organic Pure Bamboo viscose yarn.

There are many advantages of Bamboo fibre.

- It is soft like cashmere, drapes like silk and has a natural sheen
- It is less expensive than silk
- It is cool and easy to wear/use
- It is permeable and actively breaths
- It is highly water absorbent

The Bamboo plant:

- Grows easily and densely resulting in sustainable land use.
- Has a good carbon sink; bamboo minimizes co2 and generates up to 35% more oxygen than the equivalent stand of other trees.
- Is highly water-use efficient
- Has a root system which prevents soil erosion.
- Requires no fertilizers or pesticides in cultivation
