Certification

- ✓ **Health ministry approval for the source and the quality has been granted.**
- ✓ **Sri Lanka Standard institute has granted their approval for the Systems and the quality.**
- ✓ **That is SLS certificate.**
- ✓ **Environment authority has issued the environmental certificate**

About Water

If life began with water, can there be a life without water?

The importance of water

Without water all lives would end in a matter of days. Most of us think of water as just a thirst quencher but it is much more. Water is the vehicle for carrying essential nutrients throughout our bodies while helping to maintain proper body temperature and digestive process. With the recommended daily intake of **good clean water** we can maintain healthier skin, hair, muscles and joints. Of course one can live long life without having diseases. The human body is made up of more than 70% water and just a 5% drop in body fluids will cause 25% to 30% loss of energy. Doctors have advised that we need to drink 8 to 10 glasses of water to keep our body in good condition.

Water contaminants

According to experts, there are several sources of water, and most of them are harmful. This water may contain poisonous heavy metals, insecticide, pesticides, bacteria, viruses and inorganic compounds that our body cannot use. Contaminated water could cause 80% of all known sicknesses and diseases. They may contain toxic chemicals, which are absorbed in to our internal systems and our bodies, begin accumulating there. When we consume polluted water, natural cleansing functions are impaired. As a result we may develop health problems as pollutants build up in our blood vessels, joints and internal organs.

Why you should drink “Nature Fresh” natural mineral water

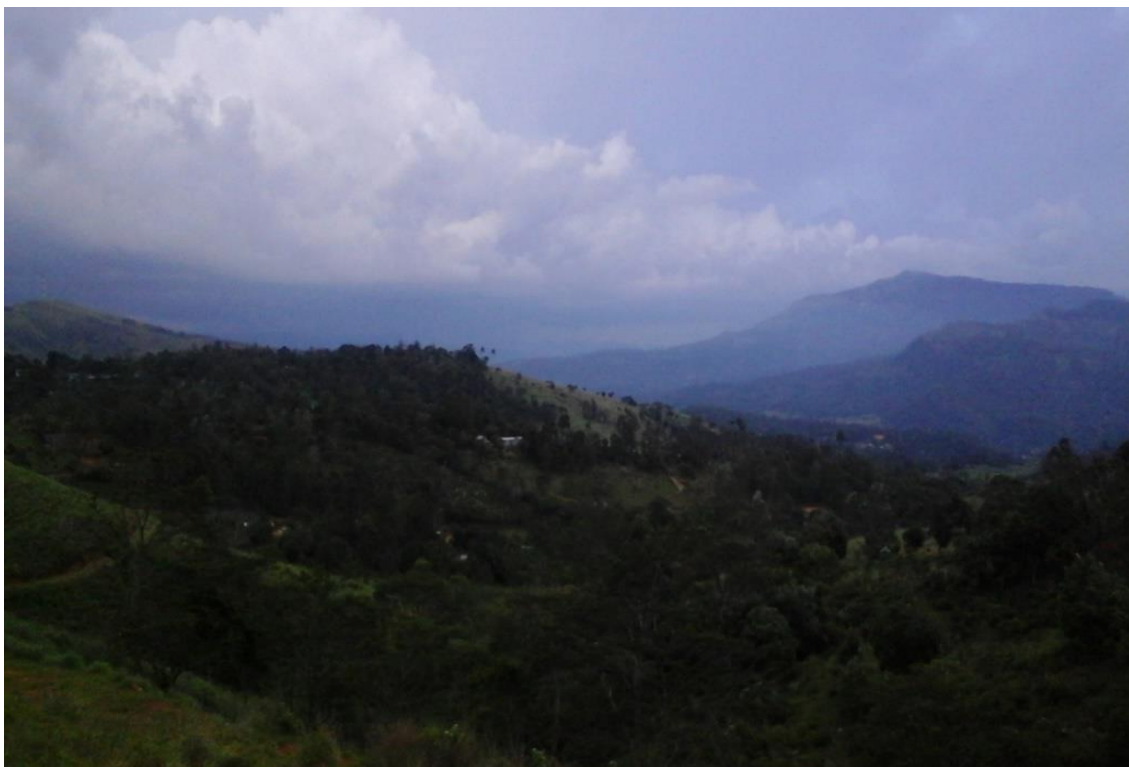

Mineral water health benefits may be very much greater than the benefits, you receive from traditional well water, distilled water and tap water. The great thing about minerals dissolved in water is, they can be easily absorbed by the body than from most foods.

Few known benefits are as follows:

- ✓ lowering of LDL cholesterol (Bad Cholesterol) and increases Of HDL (Good cholesterol)
- ✓ Balancing of Sodium (Na) levels in your body thus controls blood pressure.
- ✓ It kills bacteria and viruses that attacks the immune system that cause infections and diseases.
- ✓ Cleansing your body's toxins (added through food and air) and lowering your blood volume for better cardiovascular health.
- ✓ Adequate hydrations support good health, body cooling, keeping your mouth, nose, eyes moist, promoting optimal joints, muscles functioning and maintaining healthy shiny skin.
- ✓ Also helps proper brain functions, nervous system remains healthy and improve the natural healing capability of the body.
- ✓ prevents mineral deficiencies and makes your immune system more efficient.
- ✓ Keep your bodily fluids balanced or make more alkaline, helping to prevent cancer.
- ✓ **Magnesium (Mg)** content in mineral water contributes to make bones and muscles strong.
- ✓ **Calcium (Ca)** helps to build and maintain strong bones and teeth.
- ✓ **Potassium(K)** curing dry skin, elevating low blood sugar levels, reducing hair falls and helps to hair growth and growth of new skin cells. Especially it helps in carrying Oxygen to brain and thus supporting memorising and learning.
- ✓ **Chlorides and bicarbonates** in mineral water, promoting proper digestion, as well as effective regulation of the stomach and intestinal acids. The foods nutrients also attracted properly.

Source of Water

Nature Fresh natural mineral water is from the beautiful Island of Sri Lanka. In fact the water source is located in the heart of Sri Lanka in the mountain range, a beautiful village, Deltota in Kandy district.

Deltota, the gift of God is about 4000 feet above the sea level and surrounded by rain forest. The beauty of this village is enhanced by waterfalls and water streams and tea estates. In fact, James Taylor started his first tea plantation in Sri Lanka (the finest tea in the world) in this beautiful village.

The factory of Nature Fresh is situated in this village, Deltota and water source is about 200 feet beneath the earth surface. This is found due to extensive geological research work carried out by the company to find the best mineral water source available in the Island. This research led the company to bore down about 200 feet through different granite layers to reach the upper white lime stone layer. The water which has been collecting in this chalk aquifer proved to be extremely palatable and highly beneficial mineral content.

The nature fresh water is naturally filtered down through the ages by different granite layers away from any significant source of industrial and sea pollution.

Hence nature fresh bottled drinking water is very rich in natural precious minerals and free from bacteria, viruses, pesticide, insecticide and heavy metals. Especially free from nitrate and nitrite giving superiority of its quality

Nature Fresh is a natural treasure and a unique product of enormous value. Once it reaches the source it is immediately bottled without any chemical treatment.

The Nature Fresh water is prized for its purity and well balanced in taste rich in body's essential minerals.

With the increasing demand "Nature Fresh" company wanted to offer its customers with more natural products to enhance their health. Hence in the year 2012 company carried out **extensive geological research throughout the Island in order to find out best water source in the Island, and** found this beautiful village DELTOTA in mountain range which is covered by rain forest in Kandy District.

This research led the company to bore down over 200 feet beneath the earth surface going through different granite layers to reach the upper white lime stone chalk, which has been collecting in the chalk aquifer crystal clear natural mineral water **highly beneficial for health.** Its composition and **quality remain unchanged for many years** because of geological structure of the surrounded area.

However, now the company plans to introduce "Nature Fresh" throughout the Island as well as exporting to other countries.
