# Alfa Valley Instant Tea Factory

Alfa Valley Instant Tea Factory belongs to Alfa Exports Pvt Ltd. AEPL was established in year 2009. AEPL is mainly involved in Ceylon tea & rice exports. AEPLs main markets are CIS countries including Russia, Ukraine, Belarus & etc. AEPL built & commissioned the AVITF in year 2015 to produce high quality Ceylon tea extracts to meet the modern world tea trend. AVITF uses latest technology & machinery to produce Spray Dried Ceylon Instant Tea Powder.

# Alfa Exports Pvt Ltd

Alfa Exports Pvt Ltd's vision is to provide Ceylon tea quality ,flavour and aroma to the global market in black tea powder. Hence AEPL is specialising in manufacturing hot water soluble and cold water soluble instant tea.We use high tech modern technology in providing an excellent new way in tasting Ceylon tea.

Our plant obtained ISO – 22000 and our products maintain HACCP. Our products are 100% natural and are free of any chemicals. ( We do not use any preservatives or other chemicals in the manufacturing process ). Our production team consist of highly professional & well experienced specialists.We sell products in 15kg bulk form & in private labelled consumer packs.

## Alfa Instant Tea Products

We basically have targeted to supply High Quality Ceylon Instant Tea Powder to dry premix(3in1 & 2in1) manufactures, to confectioneries & in other different food industries.

In addition to these products we prepare customized products like natural Cardamom flavored tea powder, natural cinnamon flavored tea powder & other premixes for different individual overseas clients.

# Processing

1

## EXTRACTION

Tea liquid Direct extraction from selected black teas.

2

## CENTRIFUGE SEPARATION

To remove micro tea particles from liquid tea.

3

## EVAPORATION

To remove excess water by falling film evaporation.

4

## SPRAY DRYING

To receive water soluble black tea powder as the end product

# Technology

- 1). Specially designed modern 3 Direct Extractors for continuous extraction.
- 2). High Tech Centrifuge Disc Separator to remove micro tea particles in liquid extraction.
- 3). Uniquely designed 3 stage falling film evaporator and high pressure spray dryer to keep the product temperature low, which deteriorate active components.
- 4). Automation to keep the process continuous and optimising of feed density in every stage, thus optimising quality of finished product.
- 5). A process with zero contamination.
- 6). Sprawling infrastructure housing
- 7). Total extraction capacity.

# Food Safety

Our plant obtained ISO-22000 food safety standards & our products maintain HACCP, concept that identifies & monitors critical control points.

We buy our raw material(Ceylon Black Tea) from selected tea factories in the area. Before buying tea we randomly withdraw samples & check the quality visually, taste & basic laboratory tests like moisture. After purchasing tea transport it & store in a dry area of our warehouse.

The entire process from extraction to spray drying operates at the lowest possible temperature to optimize flavour retention & quality of tea.

The plant process is entirely on water based extraction. The water used in the process is from natural sources & we filter the water before using. Time to time water is tested in a accredited laboratory.

Moisture & microbiological test of the final product is done for each & every batch to ensure the quality.

# FAQs

- 1). **What Origins Of Tea You Use & The Production Method ?**  
Only Ceylon & spray drying.
- 2). **Do You Make Pure Ceylon Or With Maltodextrine ?**  
We manufacture only Pure Ceylon & don't add any maltodextrine.
- 3). **Do You Add Any Chemicals In Manufacturing ?**  
No. This is a 100% natural product.
- 4). **Where We Can Use This Product ?**  
To make different dry tea premixes like milk tea(2in1), plain tea(2in1) & etc, to make different RTDs, in Confectionery Industry & etc.
- 5). **Do You Do Lcl Shipments, If Yes What Is The Moq?**  
Yes we do. MOQ is 300kg
