

A man wearing a maroon baseball cap and a matching maroon button-down shirt is looking down at a smartphone he is holding in both hands. He is standing in a rural field with trees and hills in the background. To his right, a pair of worn brown work gloves and a tablet computer are resting on a pile of straw. The scene is lit with warm, golden light, suggesting late afternoon or early morning.

GROW FARMS

CONNECTING THE AGRO

Problems.

"An invisible enemy, who does not understand borders or territorial divisions, who has no predilection for one or another economic sector, has dynamited the rules of the game, COVID-19"

Costs

High number of intermediaries in the value chain.

Security

Mistrust when doing business due to not having non-payment insurance.

Exposition

Traditional sector with little access to new technologies on the market.

Solutions.

Grow-Farms wants to change the way of doing business in agriculture, through an agile, fast and safe platform b2b Marketplace.

We seek to optimize the agri-food chain by working directly with sellers and direct buyers.

01 For the community

We accompany small and medium-sized companies in their expansion process.

02 Secure platform

We have created our software with the latest technology that exists in the market.

03 In one place

Manage your entire business from one place and on all devices.

Grow-Farms.

Our mission is to be the bridge of connection with people from the agricultural sector and the whole world.

How GF Was Born.

The Grow-Farms concept started as an online livestock trading app, but soon grew into something bigger.

What Happens In The Market.

01

Digitization

Businesses are going digital.

02

Efficiency

Customers demand more efficiency and convenience when it comes to doing a trade.

03

Control

Customers want to easily manage their entire business from one place.

Target Market.

Any person or company that has an activity related to agriculture.

Companies or people from the farm with little access to sell to new customers and markets.

Buyers of agricultural products interested in developing in new markets through a platform that provides confidence.

Competitive Approach.

Fully digital

Users can carry out all their operations wherever they are, without leaving their home.

Easy to use

The application interface is streamlined, straightforward, and easy to use.

Integrated logistics

Grow-Farms has the development of a comprehensive Supply Chain Management platform that allows managing shipments from wherever the user requires it.

Safe and secure

We have an international digital bank that covers the risk of all operations within the marketplace.

How We Will Monetize.

We want the commercialization chain to be more efficient, eliminating intermediaries and extra costs.

Commission

1% of the value of the operation.

Fulfillment Solution

We buy, prepare and take the product to you wherever you indicate.

Service plan

Software for consignee firms.

How Grow-Farms Works.

Expand your business very easily

Step 01

User registration in the Marketplace.
We use artificial intelligence in the process.

Step 02

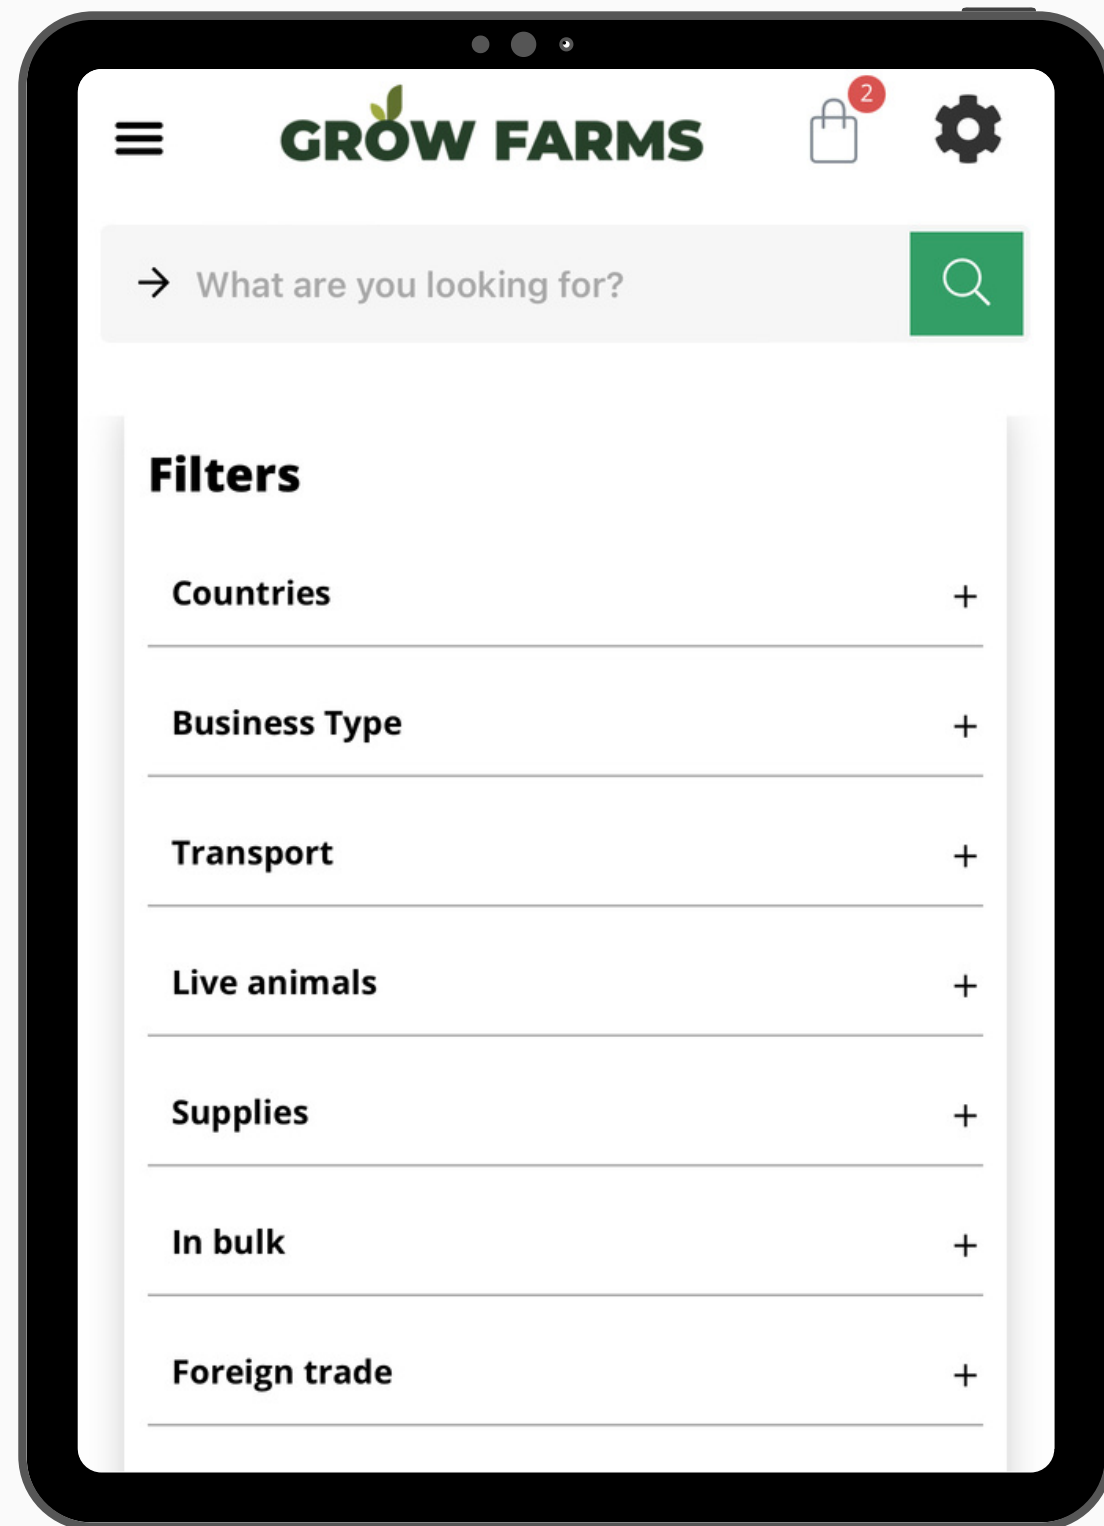

Publish products and demands.
Simple and easy.

Step 03

Browse and search for new clients.

Step 04

Agree on conditions and close deals.
We work with all means of payments
and currencies.
