

## INTRODUCING MINERALS FROM

**LANMIC** is a Sri Lankan company founded in 1998 and is in vanguard in processing high quality minerals in Sri Lanka. **LANMIC** has come a long way and gained a reputation and credibility as a provider of highest quality products and reliable services to the Sri Lankan and overseas customers. Our group has expanded up to 5 sites, located at Seethawaka Export Processing Zone, Awissawella and Kalutara industrial Estate with over 500 employees and 3 well equipped R&D labs.

We are awarded with ISO 9001:2015 and we have a modern laboratory with latest equipment. Our products are manufactured under strict quality control methods in accordance with international quality standards and on internationally accepted principles conforming to the norms of the industry.

Our main products are Calcium Carbonate, Calcium Magnesium Carbonate, Surface treated Calcium Carbonate, Quarts, Zirconium silicate, Feldspar, Talc, Mica and Industrial Clays.

To ensure the product consistency and quality we have invested in **state-of-the-art German Technology** from one of the world leading grinding and classification machine suppliers. All the mills are **lined with ceramic to prevent any contamination**.

we are the leading supplier of Calcium carbonate, Calcium Magnesium carbonate and other mineral related products to many leading organizations in Sri Lanka and overseas. We are well equipped with all the facilities to offer customize products with value additions to suite the different requirements of our esteemed customers. Apart from this, we are a contract manufacturer of detergent and chemical based products for many leading organizations as well.

After couple of decades, we have fully penetrated to the domestic market and now we are looking to enter in to a new arena by fully penetrating global market to provide the highest quality products to global customers too. We currently export our products to most of overseas clients, who is based in Australia India, Pakistan, Seychelles and Middle East Etc. Furthermore, we are recognized and admired by our customers for our service and technical support.

In this context, we look forward to serving you and introduce our company to you with confidence, and as stated above, we have the facilities and the “know how” of developing and producing customized products based on your special requirements. There is no doubt you can rest assured that your needs in mineral based products will be met to your entire satisfaction. List of the products and the applications are attached herewith for your kind reference please.

We assure you of our best in services at all times.

Thanks, and best regards,

## Applications and Industries

1. Plastics and polyethene (Master Batch)
2. Paints, and Coatings
3. Building Materials and Construction
4. Metallurgy industry (Iron and Steel metallic elements)
5. Cement industry
6. Glass industry
7. Ceramic industry
8. Chemical Adhesives and Sealants industry
9. Latex, Rubbers and PVC industry
10. Constructions - calcium carbonate is used as a filler in concrete, increasing its durability and appearance and to purify metals for use in construction applications.
11. Environment - Water treatment and Sludge treatment
12. Agri – food industry (Livestock farming - an additive to food products for livestock as a supplement in vitamins).
13. Agriculture - To provide calcium to plants and pH stabilization of the soil.
14. Paper, board, packaging and pulp - GCC (ground Calcium Carbonate) is commonly used in many types of paper, both as fillers within the paper structure as well as a coating on the surface. They are particularly prized as cost-effective fiber and  $\text{TiO}_2$  replacements in papermaking.
15. Home care - Scouring creams and powder cleaners.
16. Personal Care
17. Leather tanning
