

Essence of Nature

HDDDES GROUP

www.hddes.com

HDDes blends innovation with ancestral Traditions to produce the perfect Essence of Nature...

HDDES GROUP is a collection of companies that revolves in a corporate environment with hierarchy driven by a family based in the tropical paradise of Sri Lanka, since 1982. HDDES takes great pride in being one of the few companies that manufactures and exports Organic and Conventional Spices, Essential oils, Oleoresins, Herbal Extracts, Floral Extracts, Hydro-lates, Natural Aromatic Chemicals, Coconut based products & Instant Tea. Thus promoting the true Sri Lankan identity to the entire world whilst overcoming barriers of traditional business stereotypes to achieve various business dimensions in areas such as world-renowned Flavour and Fragrance Houses, Pharmaceutical and Nutraceutical Companies, Food and Beverages industries and Aromatherapy industries.

HDDES GROUP of Companies is well established among internationally renowned Flavour and Fragrance manufacturers for producing high quality Spices and Essential Oils from Sri Lanka. Our history dates back to the early 1930's, and was further expanded as an exporting organization in 1982. HDDES blends innovation with ancestral traditions to produce the perfect Essence of Nature...

AURA

AURA Incense sticks

Our exclusive collection of floral incense sticks is offered in a wide variety of natural fragrances, which burns for more than 3 hours. The exuberant collection of our miscellaneous floral incense sticks reveals many unexplored fascinating fragrances and transports one into an unexplored realm of relaxation.

Classic Organic Spices

Our Classic range of spices are uniquely manufactured with 100 % organically certified Sri Lankan spices. "Classic" consists of high quality, locally resourced spices grown in fertile Sri Lankan soils.

D'las Cosmetics and Body Care Products

D'las Cosmetics transforms organically sourced ingredients into sweet, fragrant cosmetics and various other body care products.

High Quality Ceylon Spices

The organization is in an excellent position to offer high quality spices such as organic and conventional spices, ground spices either in bulk quantities or consumer value added packaging with the quality systems placed in the factory namely, FSSC 22000 & ISO 22000 for food and safety management system plus HACCP, and the Kaizen quality improvement, which make sure that the higher level of quality standard are maintained throughout the vertical integration. In addition, the sophisticated in-house laboratory services make available for the customers prove that organization has well placed quality system to stop cross contamination as well as to give away hygienic products to the customers. By establishing special in-house laboratory services devoted to the spices business, customers are benefited and privileged of having analysis services.

We are using sophisticated nano-tech steam sterilizing mechanism for spice to maintain the optimum quality of our spices.

What are Essentials Oils?

An Essential Oil is a concentrated hydrophobic liquid containing volatile aroma compounds from plants. Essential Oils are generally extracted by Steam distillation, hydro distillation & supercritical extraction using CO₂. They are used in perfumes, cosmetics, soaps and other products, for flavouring food and drink, and for adding scents to incense and household cleaning products.

Various Essential Oils have been used medicinally at different periods in history. Medical applications proposed by those who sell medicinal oils range from skin treatments to remedies for cancer, and often are based solely on historical accounts of use of Essential Oils for these purposes. Claims for the efficacy of medical treatments and treatment of cancers in particular, are now subject to regulation in most countries.

Natural Flavours from Sri Lanka

Oleoresins are mixtures of volatile & non-volatiles of botanicals., in which can be extracted from spices available in Sri Lanka namely, Black Pepper, Cardamom, Nutmeg, Ginger, Cloves, Garcenia Lemongrass, and Cinnamon. Food and beverage industry is the one who uses oleoresins as an enhancer for its various types of food preparations. In order to resemble the spice quality among the oleoresins, the method that organization specializes in is the solvent extraction process which abstracts all the volatile and non-volatile components of spices where Hexane Acetone, Ethyl acetate and ethanol are used as abstracted agents with the sophisticated machinery available in factory premises by keeping the initial aroma and pungency of the raw spices. The prime attribute to succeed in the business of oleoresins is to keep the residual solvent percentage within the range of standard parameters available in a recorded format throughout the world. With the every batch that completed under the wings of HDDES Group, organization ensure that the solvent residual levels are met with the international standard with the direction provided with the laboratory established in the factory premises is a one of the success story of the organization.

Medicinal plant extracts that have a value to serve different market segments

With the direction provided by the managing director, in the year of 2006, the general portfolio of HDDES has been increased with the inclusion of medicinal plant extracts that have a value to serve different market segments. The wake and demand come through the pharmaceutical industry and the solvent extraction process established under the support of chairman himself, the medicinal plant extracts that are manufactured through solvent extraction with use of approved solvents have benefited to patients suffered from different sicknesses. The main important aspect within the product is to reduce the residual solvent amount that is pointed out with the standard legislations available throughout the world. By having the quality systems placed within the factory premises, organization is in a position to offer standard product that is required within the industry.

Hydrolates has an extremely wide range of uses

Hydrolates also known as hydrosol are an important remedy material, which has an extremely wide range of uses. Hydrolates are products made through steam distillation process. They are used in cosmetic preparations, skin care preparations, and in cases when essential oils are too aggressive. The main hydrolytes that are produced in the organization are from the aromatic spices, wood and grass distillate with water, which is heated through the process of steam distillation that captures all the essential oils with trace amounts of aromatic compounds, which dissolve in water. Once the essential oils separated through the sophisticated separation process, the hydrolates that are left will be put in large stainless-steel vessel in order to settle down. After keeping for two weeks, it is ready for exports under the label of hydrolates, which is used specially in Aromatherapy and Cosmetics industry. All Hydrolates can be supplied organically certified and conventional.

*Vanilla belongs to the family of orchid which has a genus of *Vanilla planifolia*.*

Vanilla belongs to the family of orchid which has a genus of *Vanilla planifolia*. There are few varieties in the global market has the highest demand from the vanilla from end users namely Bourbon vanilla, *Vanilla tahitensis* and *Vanilla pompon*. The active ingredient of vanilla is vanillin in which it imparts the flavour to the product. Sri Lankan quality of vanilla possess higher vanillin content which fetches highest prices from the end users revolving the global market. In nature the pod is green colour needs to be picked before it gets to fully maturity stage. Once the product is picked by the farmer then it is required to go through post harvesting processing method to convert to vanilla beans to processed commodity. In order to market the product, grading has to be done in correct manner. In practice we at HDDDES trusts with two way of grading system with the help of colour of the product namely brown to red and black colour respectively. Brown to red colour is categorized as extraction quality of the product and the black colour goes for the gourmet product.

**LIQUID
SMOKE**

Natural BBQ Seasoning and flavour enhancer

Liquid smoke is a natural product made from condensing the smoke from burning wood. The exhaust of a wood fire is basically smoke and steam; fire produces water in the form of vapor, and this vapor, condensed through a cooled tubing, captures the smoke. This liquid is distilled into a concentrate and filtered of its impurities (soot and ash). What is left is a yellowish-brown substance that is liquid smoke.

Natural Liquid smoke:

Adds a delicious smoky flavour for cooking

Designed as a flavour enhancer

No calories and fat

Not recognized as a nutrient source

Our Healing Collection

Our Healing Collection is formulated with 100 % natural essential oils and extracts. Plants contain natural compounds such as anti-oxidants, pigments, fragrances, oils, polysaccharides etc., that protects the skin/hair from external stresses. It is helpful for preventing damages to the cell/fibre structure. All of these compounds can be used to benefit human body. We extract these ingredients from plant and develop natural cosmetic formulations, enabling the replacement of synthetic and often environmentally unfriendly body care products.

AURA Aromatherapy Diffuser

Incense (from Latin *incendere* "to burn") is composed of aromatic biotic materials, which release fragrant smoke when burned. The term incense is Practical, Effective and Convenient are few words that come to mind when using an aromatherapy diffuser.

These versatile tools are used in our homes, offices and professional practices as the most widely adopted method for diffusing the healing properties of aromatic Essential Oils. Historically, the practice of diffusing oils has been an arduous and time consuming procedure; however this has been alleviated by the recent development and distribution of numerous diffusing accessories and tools.

With several styles and models to choose from, we are sure to have the perfect diffuser suited for your tastes and preferences. You can choose from the highly efficient nebulizing diffuser which relies on electrical current and pressure to emit aroma, or if you desire something with more of an elegant style you may decide to invest in one of our stunning carved Soapstone Diffusers.
