

ALUMINIUM
FOR THE PERFECT FINISH

CREATED
FOR LIVING

OUR QUEST FOR PERFECTION

Create spaces that are a reflection of your style and aesthetic. At Swisstek Aluminium, we believe that style and sustainability go hand in hand. Since 2009, we have been proud to provide top-of-the-line aluminium extrusion profiles for commercial, industrial, residential, and architectural requirements, manufactured and produced right here in Sri Lanka.

At Swisstek Aluminium, every product is subject to a stringent quality testing process. We also offer a range of breakthrough innovations for superior product performance. In striving to give you more than just a product – we bring you the functionality of everyday living while also protecting our planet.

OUR PRODUCTION

Aluminium has been used in interior and exterior enhancement for many years due to its strength, sleek outer look, and distinct feel that cannot be compared to other building materials. As it is durable and comes in many colours, it is the preferred choice by architects as well as home-owners.

ARCHITECTS CHOICE

Compared to uPVC, aluminium products have a reputation for being more versatile. Today aluminium is widely used to construct doors, windows and ventilators and front wall glazing at all major construction sites. Finished aluminium windows are a much more affordable option, depending on the required size and thickness.

A VISION FOR A GREENER WORLD

The presently-trending “Green Culture” makes aluminium the go-to choice for many, and its numerous environmental benefits only adds to the appeal. For example, aluminium is 100% recyclable without any loss of quality, and therefore can be re-used even after its long life as a fabrication. Aluminium offers excellent thermal insulation, and the developments in window design and thermal break technology means that aluminium windows and doors are currently amongst the best insulated ones in the market.

MAKING THE RIGHT CHOICE

As the industry leader in the aluminium product supply, Swisstek Aluminium ensures that all our aluminium products that are available in the market are of the best quality and standard.

At Swisstek Aluminium, we engineer value-added aluminium products at our state-of-the-art factory, using superior quality billets made of virgin metal, which are then processed with all essential pre-treatment chemical agents and certified coatings.

ALUMINIUM

THE PERFECT FINISH

WHY ALUMINIUM?

Withstanding Climates

Our aluminium can withstand any environment, be it an urban office, a suburban warehouse, a beautiful house in the hill country or even a resort on the beach.

Termite Resistant

Termites have become every home-owners reason for distress. Swisstek Aluminium eliminates this problem of termite corrosion. Unlike wood, metal does not attract insects into the house.

Fire Resistant

Safety always comes first. Swisstek Aluminium door frames are available with transoms, custom elevations, and a fire rating up to 90 minutes. Clear anodized aluminium door frames are great for any commercial door application compared to using wood or laminate doors.

Recycle Process

Swisstek Aluminium is environmentally friendly. When recycled, it creates a very high-quality new aluminium and the process only uses 5% of the energy needed to create the initial metal.

Unique Composition

Due to our unique material composition, metal corrosion in Swisstek Aluminium products is lower compared to other aluminium products, making Swisstek the ideal option for coastal constructions.

Sound-proof Ability

We all desire is to work with peace of mind, or to live in a relaxed city life away from the hustle, bustle and external distractions. With Swisstek Aluminium windows and doors, you'd have nothing to worry about when it comes to sound-proofing entrances both ways.

Export Quality

We pride ourselves on manufacturing one of the best aluminium casements in South Asia. Our powder-coated aluminium is extremely durable which means that whatever finish you choose will last for up to 45 years or longer depending on the maintenance and the environment.

OUR PRODUCT RANGE

There's no doubt about the quality and benefits of Swisstek Aluminium products, and our range is a testament of how versatile and diverse aluminium can be.

ALLURA

The Allura aluminium door and window systems are a cut above the rest in terms of manufacturing and craftsmanship. These systems are created by our network of highly skilled and certified fabricators using Swisstek Aluminium profiles with accessories from Swisstek Aluminium as well. With this powerful combination, Allura ensures the highest quality standards, style, and durability.

TILT & TURN

If you're looking for modern elegance, the Tilt and Turn range offers better air flow and natural light to your spaces along with the added benefit of security.

Highly functional, it allows for a swing-open mechanism along with a twistable dual function handle. Easy maintenance and an airtight fit keeps out dust and insects while providing ventilation.

SWING WINDOWS

Allura Swing Windows usher in natural light to your home. These Swing Windows are climate-proof, making them perfect for wherever your home may be situated. These windows are as sleek and stylish as they are secure and safe.

SWING DOORS

Allura Swing Doors help you create portals of access across your home. Whether used inside or outside, these sleek and stylish doors not only optimize natural daylight, but they also ensure security for you and your loved ones.

SLIDING WINDOWS

Allura Sliding Windows and Doors are the epitome of style and sensibility. These windows and doors allow you to completely slide open and expand internal spaces to your different design requirements. Available in both double-track and triple-track, they allow for unobstructed views of the inside and outside of your home with minimal space.

SLIDING DOORS

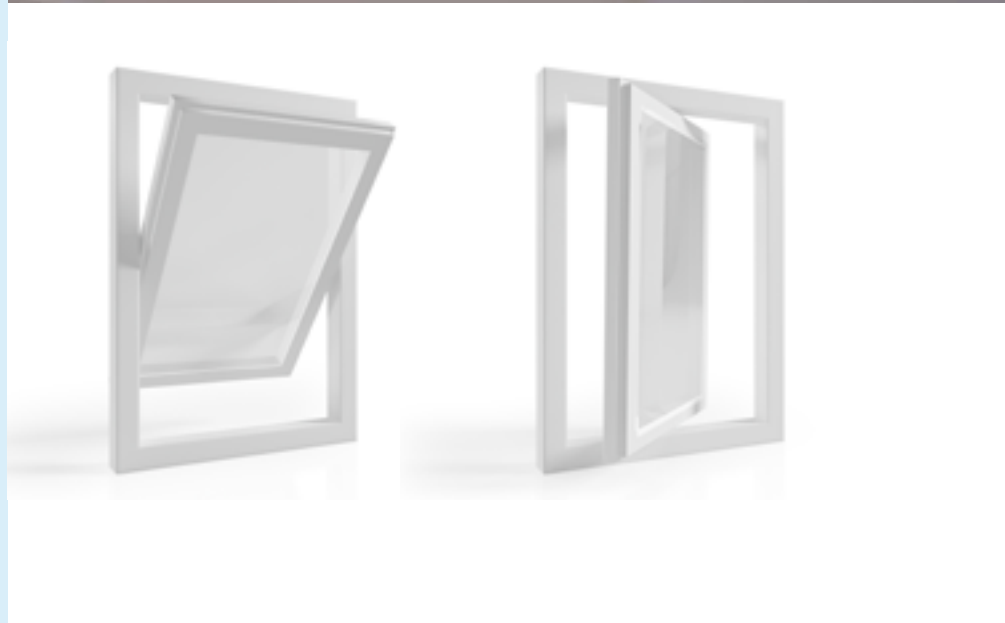

Invite natural light and fresh air into the living or work areas in your home. These sliding doors give you convenience, durability, and security. The product finish is slender, sleek and sophisticated, yet also sturdy and long-lasting, and beautifully complements the overall look of your home.

PIVOT

At Allura, we understand your need for style but combined with durability. The Pivot range of windows allows for easy and safe maintenance and is an innovative and modern window solution for your space. The design allows the pivot of your window, offering the ability to manage the best angle to optimize natural ventilation even in the smallest space.

LOUVRE AND SCREEN

Allura Louvres and Screens are the ideal choice for your home as it provides ventilation along with security and protection. Allura Louvres and Screens keep away external elements and insects without having to compromise on air flow. Louvres are able to be tightly sealed shut to keep out water and wind while Louver Windows are a good option for breezeways, allowing for natural air flow, creating a secure, yet well ventilated space.

SLIDING FOLDING DOORS

Allura FoldingDoors are an ideal way to connect internal spaces with external areas. These verstaile doors can maximize space within the same area through their door partitions. With their smooth gliding movement, optimal functionality, and stylish configuration, these doors add class and style to any large open space.

PANEL DOORS

Panel doors are great for exterior spaces; they create a sense of privacy along with flexibility through colour and design. Panel doors are also suitable for interiors as they can block out sounds, and turn every space into a cocoon of comfort. Panel doors are popular due to the fact that their construction makes the door a more solid design solution.
