

VIGLIENZONE

1924-2021

Made in Italy 

- 1924** **Viglienzone Group** is established in Genoa.
- 1961** **Viglienzone Adriatica Spa** is founded and the company position in the international forwarding sector is strengthened.
- 1987** Viglienzone is recognized as “Official monitor” by the European Union
- 1990** Viglienzone expands its inspection activities on an international level on behalf of agencies and non-governmental organizations
- 2010** Our rail logistics services and our inspection services are further developed thanks to the opening of our branch in Hungary, Argentina, Brazil, Ukraine, Russia, Singapore and others.
- Today** **Viglienzone** has reached a leading position in the market, operating both in Italy, and abroad.

SUMMARY

- Viglienza has years of experience in the field of inspections and is internationally recognized (Level EC).
- Our company guarantees an immediate decision-making system and a customized service for its clients.
- Our staff is highly specialized and extremely flexible to face critical situations and inspection problems and report them directly to the central office.
- We make use of the most advanced Data Processing Center, allowing double storage of all clients' information both on EDP and I-cloud.

OUR STRENGTHS

OUR ACTIVITIES

- Inspection of quality and quantity of supplies at factories, at warehouses, during loading/discharging into trucks/containers or vessels
- Verification of the quality of the goods, of the origin of the main components and check of the assembling process
- Check of weight, packing, seals
- Check of trucks/containers/vessels and verification of their suitability to the goods to be transported
- Issue of Certificates at origin or destination
- Non-conformities are promptly reported to the client so that actions can be taken.

INSPECTION ACTIVITIES

Viglienzone is specialized in the agrifood sector. It organizes and supervises, both in export and in import, all physical and documentary customs and port operations involved in the movement of vessels carrying a wide range of agrifood products.

Cereals

Flour

Meal

Sugar

Vegetable oils

Oil-seeds

Rice

Pasta

Pulses

Dairy products

Canned vegetables and meat

Animal feed

Viglienzone can perform the following inspection services on liquid products:

- Quality and/or quantity controls
- Static and/or dynamic sampling
- Inspections to ensure tanks cleanliness, their integrity and reliability
- Physical inventories to ascertain the quantity of stored goods
- Tank calibration
- Ascertainment and surveys of weight shortage/loss
- Chemical-physical analysis through accredited laboratories
- Verification of stocks and check of loading/unloading register at distribution points
- Training courses for refinery and depots operators
- Operational, Safety and Quality consultancy services

LIQUID PRODUCTS

- The Controls Department can perform inspections also on the following goods: agricultural machinery, agricultural tools, medical equipment, medical devices, industrial vehicles, industrial machinery, equipment and spare parts.
- Our inspectors operate verifying the conformity of the goods with the contractual technical specifications before, during loading and at discharging, drawing up accurate inspection reports.

MACHINERY, EQUIPMENT, TOOL SECTOR

Viglienzone can also perform inspection services on steel products and testing services to assess the quality and quantity at mill, in storage and at port.

Also coal and petroleum coke, as well as solid chemical fertilizers both bulk and bagged form (Granular Urea, Phosphates, etc.) can be inspected at plant, in storage and at port.

Viglienzone is ownership of new high-capacity railway wagons for the transport of cereals and can offer to the clients:

- Rail freights integrated with export and import
- Organization and planning of transportation
- Connected services of transport, storage (in/out) and further assistance for the redelivery to the market of the feed and milling industries
- On-line tracking of shipments with real-time information
- GMP+ certifications for rail transport
- Weight and quality control of the goods

Our established cooperation with the main rail logistics operators allows us to connect the main Italian ports with the most important agri-food operators.

We are active on traffic flows from East Europe to West through our Viglienzone Hungaria Kft, and we take care of the supply networks of important Italian operators, by connecting them to most of Eastern and Western Countries (such as France, Hungary, Romania, Slovenia, Croatia, Serbia, Austria).

Viglienzone can offer for the clients during import-export operations the following services:

- Assistance at loading and discharging
- Free sanitary practices
- Customs clearance and formalities
- Collection and delivery of the goods, providing assistance and supervision of the goods shipped in containers and in transit through Italian and foreign ports.

Viglienzone's services also include booking and organization of transport.

We are active in Genoa Office to offer directly import-export FCL, LCL and brokerage shipments.

FORWARDING AGENT & CONTAINER DEPARTMENT

Import

Export

- Import and Export formalities;
- Management of customs clearance procedures;
- Assistance to the client with Public Authorities (Phytosanitary, Health Authority, Customs)
- All services are available for a wide range of products (agri-food and feed products, chemical and steel products) and are carried out in compliance with national and EC standards.
- Redelivery on trucks / wagon and issuing DDT (Document of transport)
- Our Trade Execution teams work maintaining active dialog with clients to ensure smooth and accurate execution of commodities contracts

CUSTOMS & EXECUTION SERVICES

SOME OF PRIVATE INTERNATIONAL CLIENTS

PUBLIC INTERNATIONAL CLIENTS

Viglienzona online platforms allow the clients to find quickly all the information they need.

Through the “Reserved Area”, the client can get in real time all the data related to the services that we offer in the following sectors:

- **Agrifood sector**
- **International inspections**
- **Rail logistics**

Cargo

Our online software Cargo, makes it possible to find all the information concerning the sales/purchases and the handling of agri food products, among which:

- Sales data (past and present)
- Purchases data (past and present)
- Customers and suppliers pick-ups (past and present)
- Expiry of free storage periods
- Real time update of the trucks at port warehouses (incoming, under loading, outgoing)
- Loading points and tracking of the loaded goods
- Goods delivery reports and DDT in pdf format
- Daily handing
- Statistics on handled goods

My Survey

This new service allows the clients to have access in real time to all the information concerning the inspections performed (working times, quantities inspected, details of the sampling operations, documents issued, etc.).

MySurvey offers the following benefits:

- A common platform where all the data concerning the inspections performed can be uploaded and recorded, avoiding e-mail exchanges;
- Access in real time to downloading photos, videos, certificates, documents and statistics concerning the activities performed;
- A list of Laboratories with their certificates and accreditations where clients can check and download them

My Train

Concerning rail logistics, the software MyTrain offers in real time detailed information related to the rail transport of goods, such as:

- Rail wagons list in real time and previous data
- Details about quantities and type of goods
- Details about suppliers
- Weight and number of wagons
- Time log of loading and discharging operations
- Certificates for each train
- Details about departure and arrival stations
- Statistics

The clients using our online services are provided with their own access code allowing to protect the confidentiality of their data.

MySurvey®

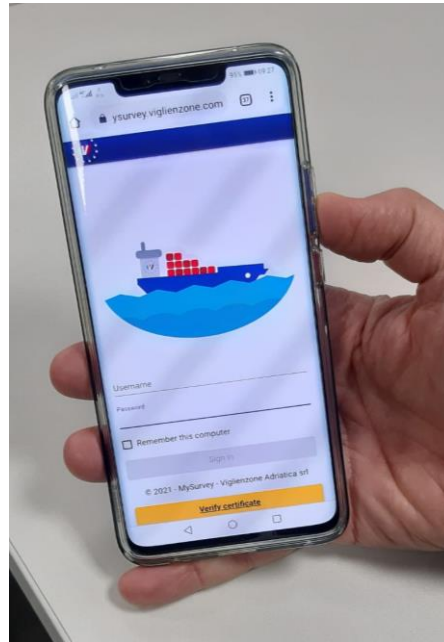

Vigienzone, thanks to the newly developed software MySurvey, enables the client to get in real time all the updated information.

Speed up the exchange of information between the Inspector, the Coordination Office and the Client.

Allow to create and upload all our certificates and they will be issued as E-Certificate® (electronically signed certificate) with automatically generated QR Code allowing the Client, to verify the authenticity of the same.

Allow the inspectors and the coordination office to work on a common platform, where data can be recorded, processed and exchanged, avoiding emails.

Give the chance to clients to follow in real time loading/discharge operations and to download the documents, photos, analysis concerning the inspection performed.

It is a secure web based tool to automatically generate multiple International Trade instructions and documents, where the information is entered in the system only once and the documents are produced (such as blockchain e-Bills of Lading, Certificates of Origin, Quality Certificates as well as many other shipping and commercial Documents) with the same accuracy the information was originally entered.

This allows every participant of the transaction, such us, custom brokers, supervision and fumigation companies, maritime agents, inspection companies, official authorities, chambers, etc, to log in directly in the system and get and/or include information, avoiding repetition and retyping of them.

Our activity of shipping agents started through our subsidiary company **Margest**, upon request of clients who, after testing the services provided by Viglienzone, were interested in receiving a more complete service and assistance in their vessels port calls.

We are present in the main Italian ports and we can offer a service of chartering and insurance. Each stage of work is carefully checked by our offices, in order to assist the vessel with a centralized management and supply information in real time.

SHIPPING AGENCY

Viglienzone has been recognized as **AEO** (Authorized Economic Operator) which certifies its reliability as operator towards customs authorities and include an easier access to authorizations, simplifications and a reduced level of customs controls.

Has been recognized “Specialized internationally Company” in the field of Control for the purpose of issuing certificate proving the unloading and/or importation of agricultural products for which refunds in Third Countries are granted (Reg.n.612/2009/EC).

Has been recognized by ACCREDIA for inspections of type “A”, in compliance with **UNI CEI EN ISO/IEC 17020**

Viglienzone has been GMP+FSA certified.

Viglienzone Adriatica is a member of:

- TIC Council (the Testing, Inspection and Certification Industry)

- FOSFA (the Federation of Oils & Fats Associations)

- GAFTA (the Grain & Feed Trade Association)
