**Directors:** Nihal Ellegala, Remon Ellegala

### Main Businesses

- Eko Tourism
- Direct Export of organically grown farmer Produce

## **Current business status of our exports**

We have a farmer network of 600 vegetable & fruit farmers and 70 spice farmers. We, together with relevant government agencies educate the farmers on best farming practices and to harvest at the right time. We purchase directly from the farmers, the raw product for cleaning, drying, processing and packing in our own factory situated within our villages. In this manner we can produce the best quality fresh spices for the international market. We currently export a wide range of spices and other value added agricultural produce to the USA, Netherlands, UK, Sweden, Denmark and Austria.

Although our farmers do not apply any chemicals to their farm lands, we do not have at present any certification to that effect. However we could arrange within a few months certificates of your choice if your order quantity (MOQ) of all produce is more than 1,500Kg per year. Our usual packing is in corrugated cartons in 3-5Kg net weight and in aluminum-lined kraft paper bags of 20 to 30Kg Net. Our usual payment terms are 50% in advance and the balance when receiving the goods and for larger shipments, by sight L/C. Smaller parcels of less than 100Kg are best sent by DHL/UPS and larger parcels by ocean freight in containers.
