EucoClean Australia

COMPANY BRIEF

Company Ownership: EucoClean Australia is a family owned Pty Ltd company associated by ownership with other companies in the Cleaning Product manufacturing and Property Services segment.

Primary Business: Manufacturing packaging and marketing a range of Organic Cleaning, Hospital Grade Sanitising, Insecticide and Herbicidal liquids for domestic and commercial applications.

About the Range: There are 11 products in the EucoClean range. The original 3 in 1 Organic formula was developed in 2009 as a “chemical free, non toxic” Cleaning and Sanitising agent for allergen sensitive and environmentally conscious clients. Our chemists turned to nature and the EucoClean Organic Anti-Bacterial cleaning range was developed using Essential Oil bases and Organic Compounds. The range later extended with a surface spray to control and kill Fleas, Bed Bugs, Lice, and other parasites. Further development then introduced an effective soil safe domestic Broadleaf Weed Killer. All our formulas are People and Pet safe, Allergen Free, Phosphorous Free, Bio Cycle Safe, and 100% Biodegradable.

Company Resources: EucoClean’s manufacturing facility in Blacktown NSW is an “Australian Organic Certified ” registered manufacturing site with a capacity of 7000 litres per shift. The plant manufactures high volume organic liquid products. We operate a dedicated “water soluble only” liquid filling line and distribute from two warehouse facilities based in Sydney Australia.

Distribution Footprint: The EucoClean range is distributed both locally and internationally being sold in Australia, North America, South America, Europe and Asia either under the EucoClean brand or other license agreements.
