

Famed Żywiec is a leading European manufacturer of high quality medical equipment. For more than 75 years, we have supplied medical facilities with thousands copies of the highest quality operating tables, hospital and delivery beds or treatment chairs. Our products are used by doctors all over the world, in the most demanding markets and in the most difficult conditions.

We have built the strength of our brand based on more than 140 years of experience of Żywiec companies and craftsmen specializing in the manufacture of metal products. Qualified staff is our key advantage. Thanks to the commitment of high-class specialists, supported by modern machinery and unique technological solutions developed over the years, we provide equipment with an exceptionally positive reputation, contributing to improving the quality of medical care in Poland and around the world.

We were one of the first companies in the world to use carbon in the production of operating tables. Hundreds of tests and prototype work have led us to create the world's safest table for medical imaging, whose table top has twice broken the world record in reducing the dose of X-ray radiation transmitted to the patient. Carbon fiber is lightweight, resistant to corrosion and chemicals used in hospital disinfection, and its strength is ahead of steel. It provides good translucency and clarity of X-ray images.

Our mission is to make the work of medical staff easier and increase patient comfort during the hospital stay. The innovative designs and commitment to reliability of our products directly contribute to improving the quality of medical care in Poland and around the world.
