

Hortimed HUMUS

Plant Biostimulant

Contains natural humins, oligosaccharides, aluminosilicates, organic humic, fulvic and amino acids of plant origin and organically bond potassium. Stimulates nutrition and the biological processes all over the plant's life cycle.

Organic substances in dry matter..... ≥55%
Humic acids in dry matter..... ≥50%
Dry Matter..... ≥9%
Total humic acids in form of ≥7%
potassium salts

Application and tests

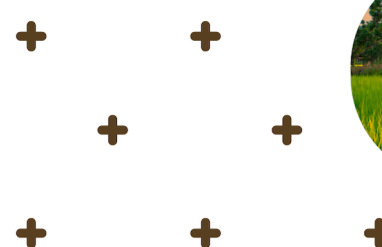

Foliar application:
2 L/ha, 3-4 applications per season (total 6-8 L/ha)

Drip irrigation:
10 L/ha, 3-4 applications per season (total 30-40 L/ha)

Hydroponics:
250-300 ml/1000L nutrient solution during the cultivation cycle (product/water).

Improve your yield up to 50%

Our test results show a significant increase in yield, marketable yield and overall plant growth.

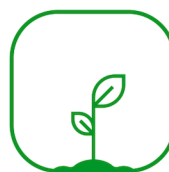

Harvest up to 2 weeks faster

With our product, you can reduce abiotic stress, improving growing conditions and on average our clients harvest their plants 2 weeks earlier compared to plants without our product applied.

Reduce fertilization costs by up to 30%

You can use 25% less fertilizer with our product, so on average you can save up to 100\$ per ha, using our biostimulants.

Organic certified

Certified product for organic farming ensures the product quality and that it is future-ready and innovative, so you can be the pioneers in the agricultural industry.
