WHO ARE WE?

We are a company that specializes in food innovation and technology. With a team that has over 30 years of experience in the industry, we aim at promoting a continuous process improvement and offering solutions to our clients, securing the final product's safety.

WHERE ARE WE?

Our extrusion plant in Buenos Aires, Argentina, processes different types of plant proteins, obtaining products with enhanced functionalities and, in turn, guaranteeing its quality.

ALMAPROT

We offer plant-based proteins extracted through a high-moisture extrusion process, modifying its molecular structures and providing a fibrous texture. Due to its low-fat content and highest percentage of protein, it adds nutritional value to food products.

We develop the textured soy in different colours and thicknesses with the objective of meeting the requirements of each client.

CERTIFICATIONS

Certification in process: FSSC 22.000

OUR ALLIES

• SUPPLIERS

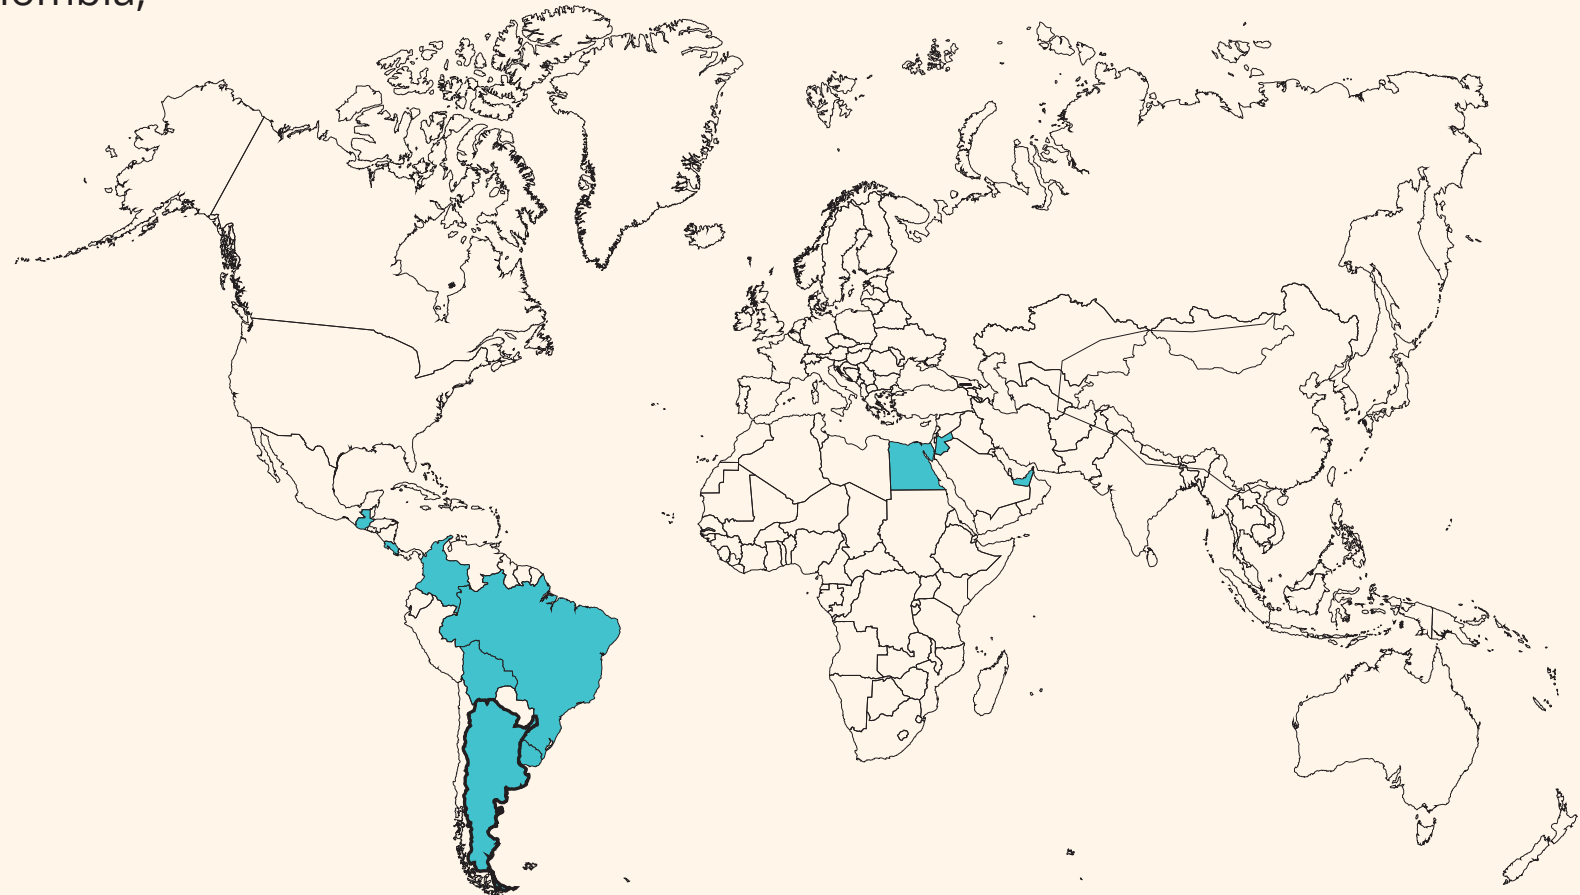

Our raw material suppliers are the largest soybean processors in the world. They are all in Argentina, a few kilometers away from our plant. Guarantee of volume and quality of the highest level.

OUR ALLIES

• CLIENTS

We export annually to multiple destinations in 3 different continents. Such as Arab Emirates, Jordan, Egypt, Costa Rica, Guatemala, Colombia, Uruguay, Bolivia, Brasil.

Our production capacity is 1.100 tons per month of textured soy protein.
