ABOUT US

The founders of **TM «EcoFruit»** started their activities in 2009. The main direction of activity – is realization of subsistence agricultural products, as well as industrial deliveries to processing enterprises.

In 2015, the company started to grow grapes on its own plantations. This area has a unique geographical location: the region is windy, sunny, far from the industrial zone and is ecologically clean, thus providing an environmentally friendly product. Besides grapes, we grow apricots of different varieties, walnuts and almonds, namely the «Chandler» variety, as well as various varieties of almonds «**Guara**», «**Nonparel**», «**Bellona**» and «**Lauren**».

The company provides a wide range of ecologically pure products of more than 150 dried fruits, pulses and nuts, and the prices are competitive. The process of preparation of products includes: cultivation, drying, processing and packaging. The organization packs various finished products for the supermarket chain.
