KAURA COPRODUCTS

About us

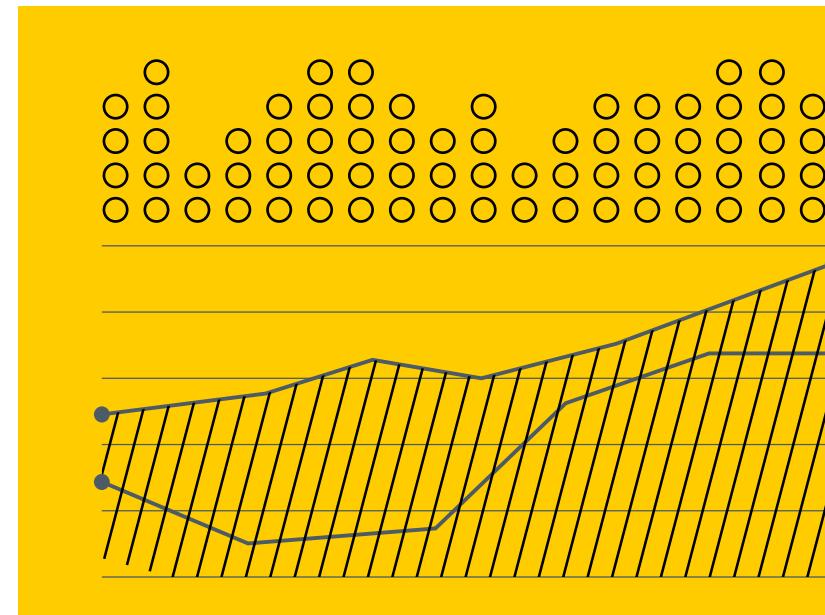

We are a family business with a clear international vocation and, since 1940, we have dedicated ourselves to producing processed animal fats and proteins mainly intended for pet food and aquaculture. With more than +80 years of experience in the sector, our strong focus on **Innovation, Quality and Sustainability** has made us a benchmark in Spain in the revaluation of animal waste.

Our brands RenFeed, RenPork and RenFats represent this projection that drives us towards a better and smarter future.

Exportation

We are exporters. The 80% of our final product ends up outside Spain. Currently, the main destinations of our exports are Europe, Southeast Asia, South America and the Middle East.

Facilities

Kaura Coproducts has facilities in Salteras (Seville, head office), Mérida (Badajoz), Aznalcóllar and Pedrera (both in Seville), Jabugo (Huelva), and Totana (Murcia).

After years of experience and refinement, we have reach to manufacture **highly balanced and high quality animal proteins**. As a source of essential nutrients, this ingredient provides a healthy intake for our little friends. Thanks to our specific production system, **we achieve a great smell and palatability** which make the final product more tasty and digestible than average.

Is our Main Product for **Aqua and Petfood**

Poultry meal 65%

- Protein 65%

Petfood and Aquaculture.

Markets: Europe, South America, the Middle East, Southeast Asia.

Production: 25.000 Tn/year.

The south of Spain is famous for Iberico ham, a top quality gourmet product that comes specifically from acorn-fed iberian porks. In 2019 we took a step forward and open a line for this kind of product to provide **new opportunities to our customers**.

This certified ecological product **adds an unique premium and exclusive value to petfood**, thanks to its distinctive flavor and omega3 content.

Besides this Free-range pork meal, we produce regular Iberico Pork meal as well, **perfectly suitable for Petfood and Aquaculture markets**.

Product:

Iberian Pork Meal

Sectors:

Pet food / Aquaculture

Market:

Europe, Asia, South America

Production:

2000 Tn / year

Product:

Free-range Acorn-fed Iberian Pork Meal

Sector:

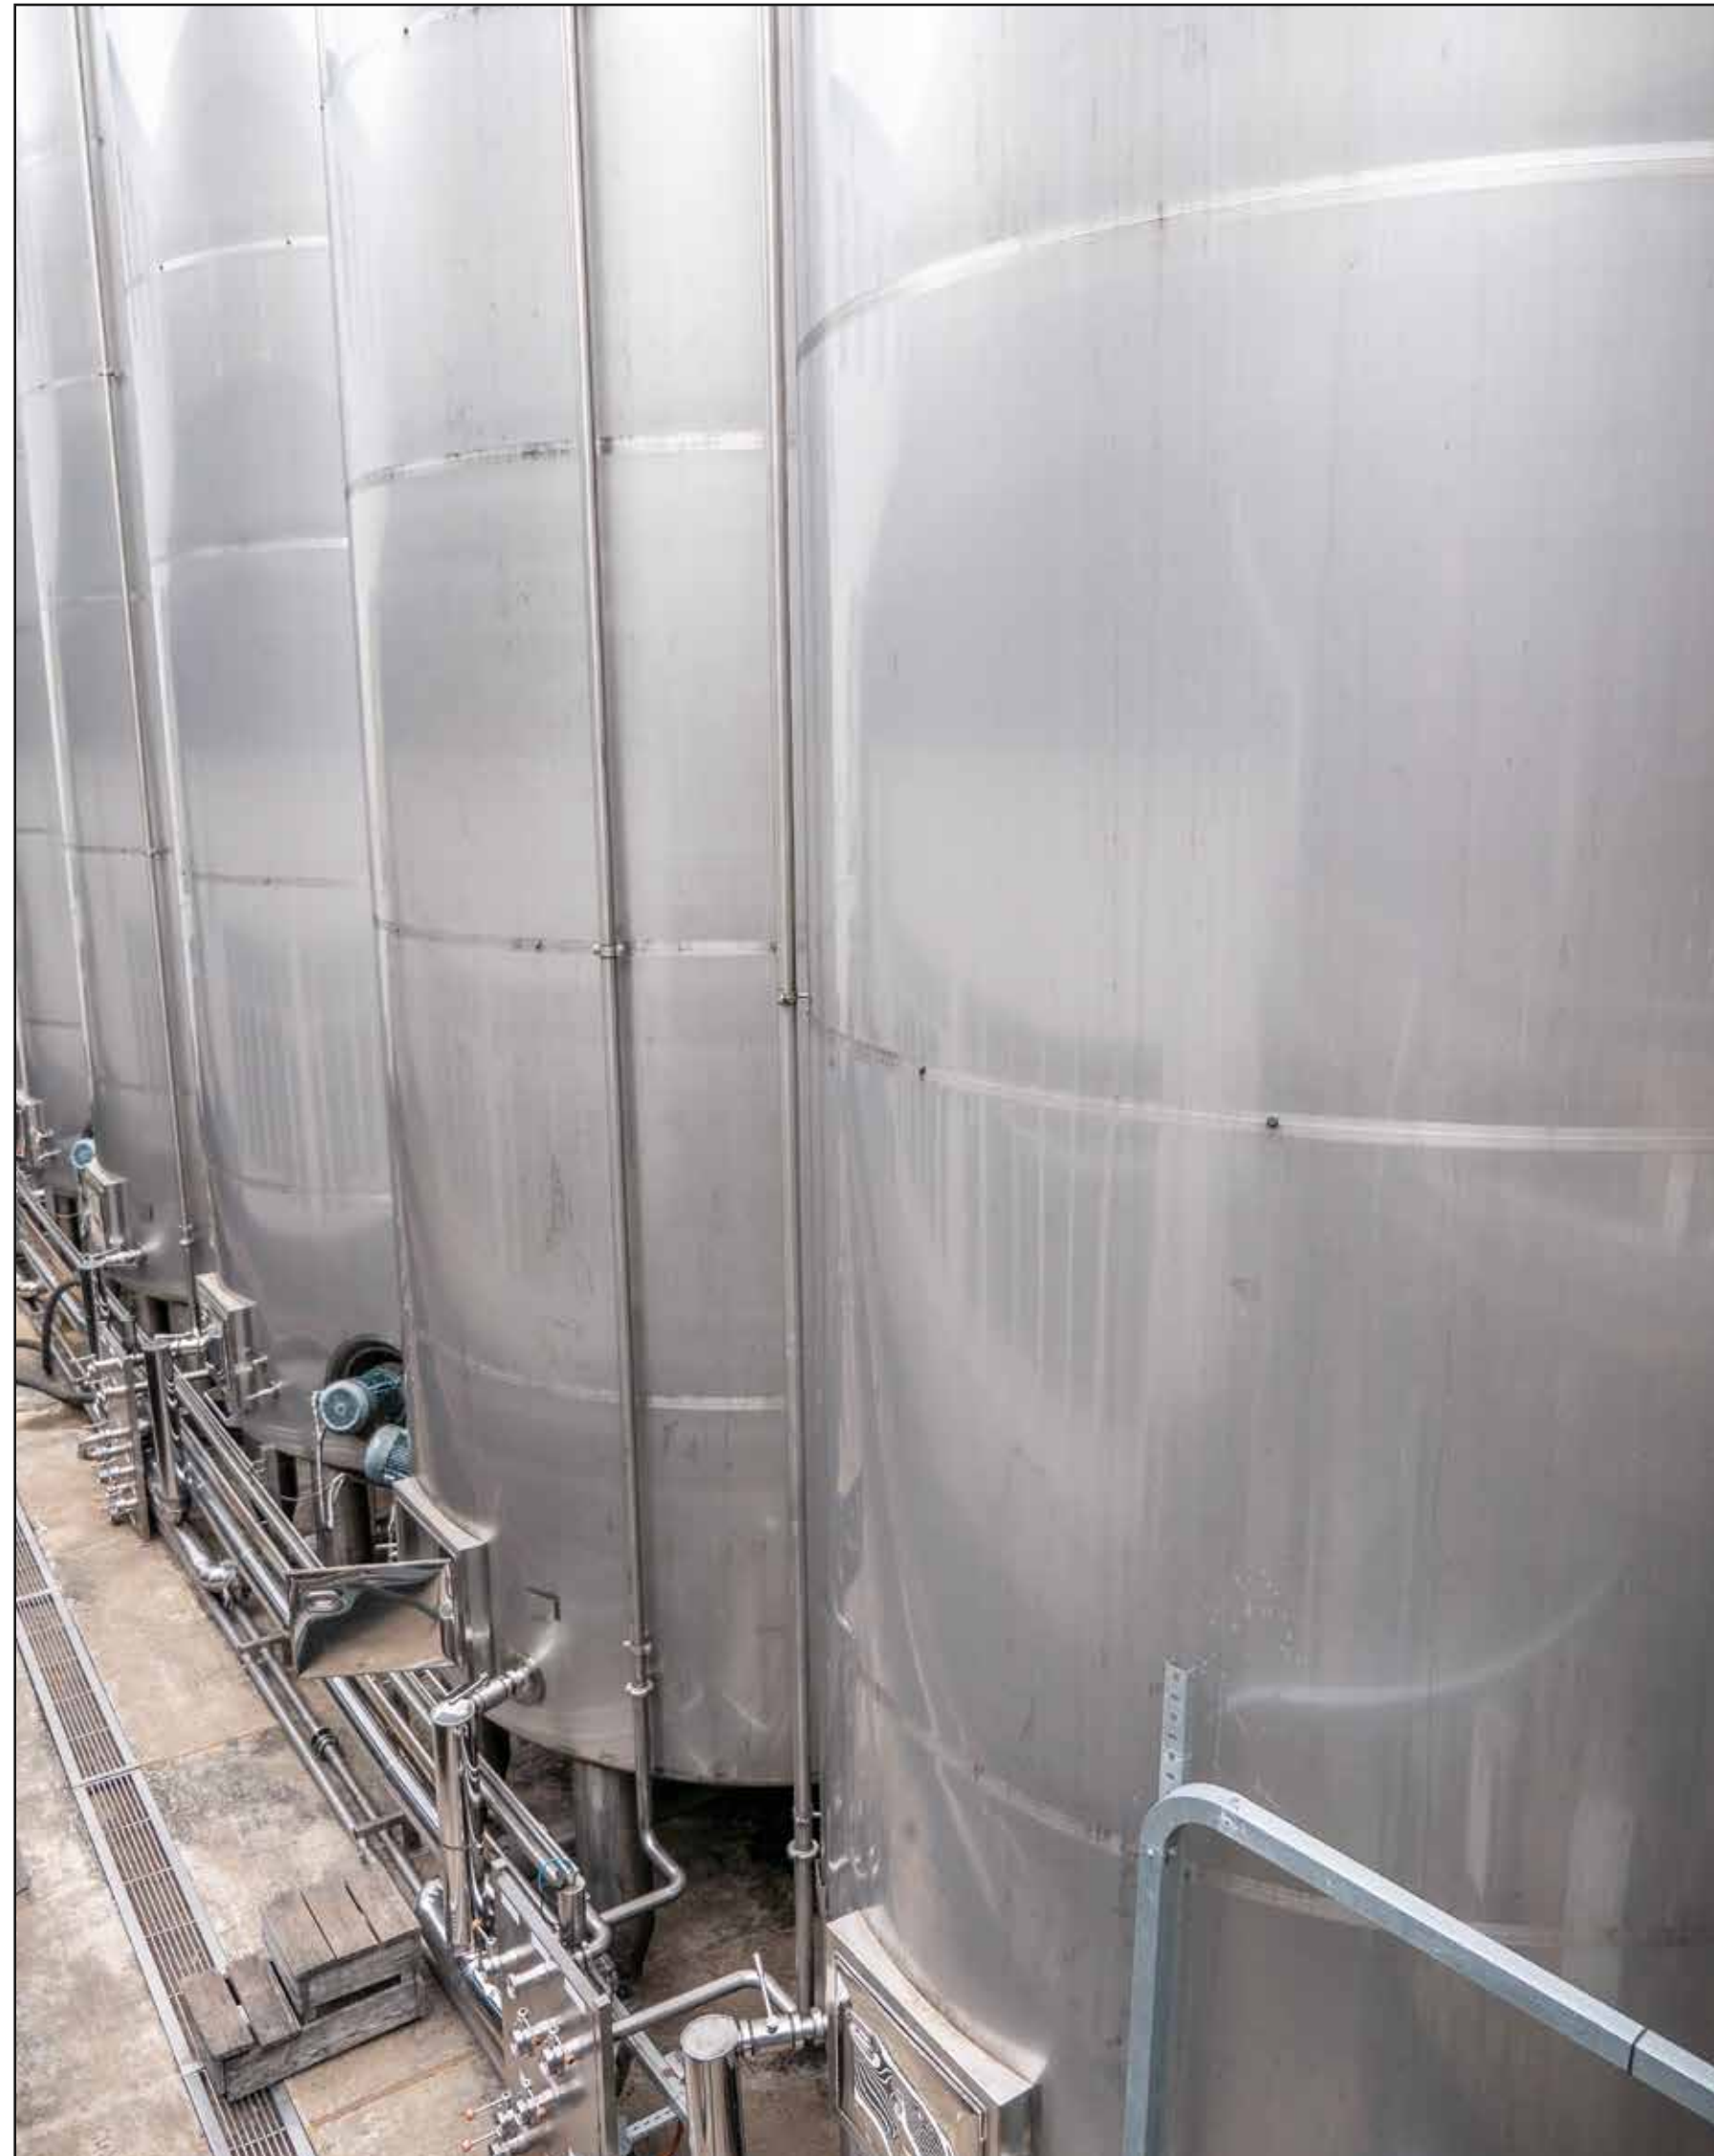

Pet food

Market:

Europe

Production:

600 Tn / year

50 years of experience with fats for animal feed turned us into a benchmark for sustainable ingredients.

Producing fats for animal feed, **we provide to our customers a valuable source of nutrients that increases the palatability and efficiency of their feed**, helping to achieve optimal growth aim.

Our fat is also a valuable component resource for biofuels and has an ISCC Certification.

7800 Tn / year

Product:

Pork fat

Sectors:

Pet food / Aquaculture

Market:

Spain, Europe

Production:

10000 Tn / year

Trade:

6000 Tn / year

Quality

ISCC Quality Certification

It accredits our compliance with the sustainability requirements in the bioenergy markets and documents raw materials traceability.

ISO 14001 Certificate

It ensures a production activity in accordance with the procedures stipulated in this area.

SGE21

A step forward in responsible and ethical management. The SGE21 goes from environmental to anti-corruption control, to ensure companies are transparent and ODS focused.

It ensures strict compliance with procedures to provide greater hygiene safety to feed production chains.

GMP+ Quality Certification

Kaura's adaptation has taken a year of effort in the different occupational health and safety-related aspects.

ISO 45001 Certificate

Innovation

We have a technology that is unique in the European Union. We execute an R&D&i project that is unrivalled worldwide to control processes and products in real time, through the combination of information obtained from sensors strategically located in the process line, with information and communications technology (ICT).

NIRS sensors (a spectrum used to determine product quality parameters, such as chemical composition, physical properties or sensory characteristics), provide a rapid response and simultaneously analyse various meal and fat composition parameters. The project is funded by the Technological Corporation of Andalusia (CTA).

We care

In Kaura, **we like to build our relations consciously**. As we care about our customers, we care about our surroundings and environment. This commitment to society is supported by different actions.

Equality

We collaborate with APASCIDE, the Spanish Association of Families of People with Deaf-blindness. This Association does the commendable work of managing a residence for people with disabilities. Opened in 2012 in Salteras by Queen Sofía, their labor is unique in Spain.

Environment

Nature is constantly facing residues problems. That encourage us to do something about it, besides our activities. We work with Quique Bolsitas, and environmental activist that spends his spare time cleaning the nature.

Sports

We promotes a healthy lifestyle, supporting sport in its environment, through El Llantazo Cycling Club of Gerena, Club Deportivo Salteras football club and athletes in the region, with various specialties and high performance

We care

Local music

We sponsor two of the most prestigious philharmonic societies in Seville: El Carmen y La Oliva, both from Salteras.

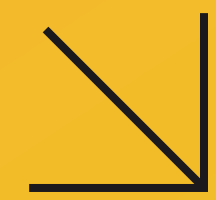

Youth local employment

We offer partnership agreements to the surrounding town councils to facilitate finding employment by training university students.

School

The public school Nuestra Señora del Carmen in Guillena was able to perform a spectacular activity in which an astronaut orbiting the ISS was interviewed.

Kaura helped in this very newsworthy event and in a few more that about to come.
