OUR COMPANY

FENIKSCHEMIA Sp. z o.o. was established out of the will to provide the highest quality products and knowledge about the possibilities of their use to increase the profitability and quality of our clients' businesses. Together with the products, we provide the knowledge, experience and skills of our employees. We produce a whole range of chemical agents with a different pH range and for different purposes.

INNOVATIVE SOLUTIONS

In our Research and Development Center there is a modern laboratory equipped with specialized devices that ensures not only high quality of the offered products but also the creation of new innovative features into our line-up.
