

ALCO2EST

15 years on the market

Export to 71 countries

Trusted us millions of customers

Manufacturer of disposable breathalysers

BUSINESS OFFER

WWW.ALCO2GO.COM

We are a manufacturer of the best, and above all completely harmless to health breathalysers.

Test & Drive products do not contain potassium dichromate, a poisonous and carcinogenic compound used in older generation breathalysers.

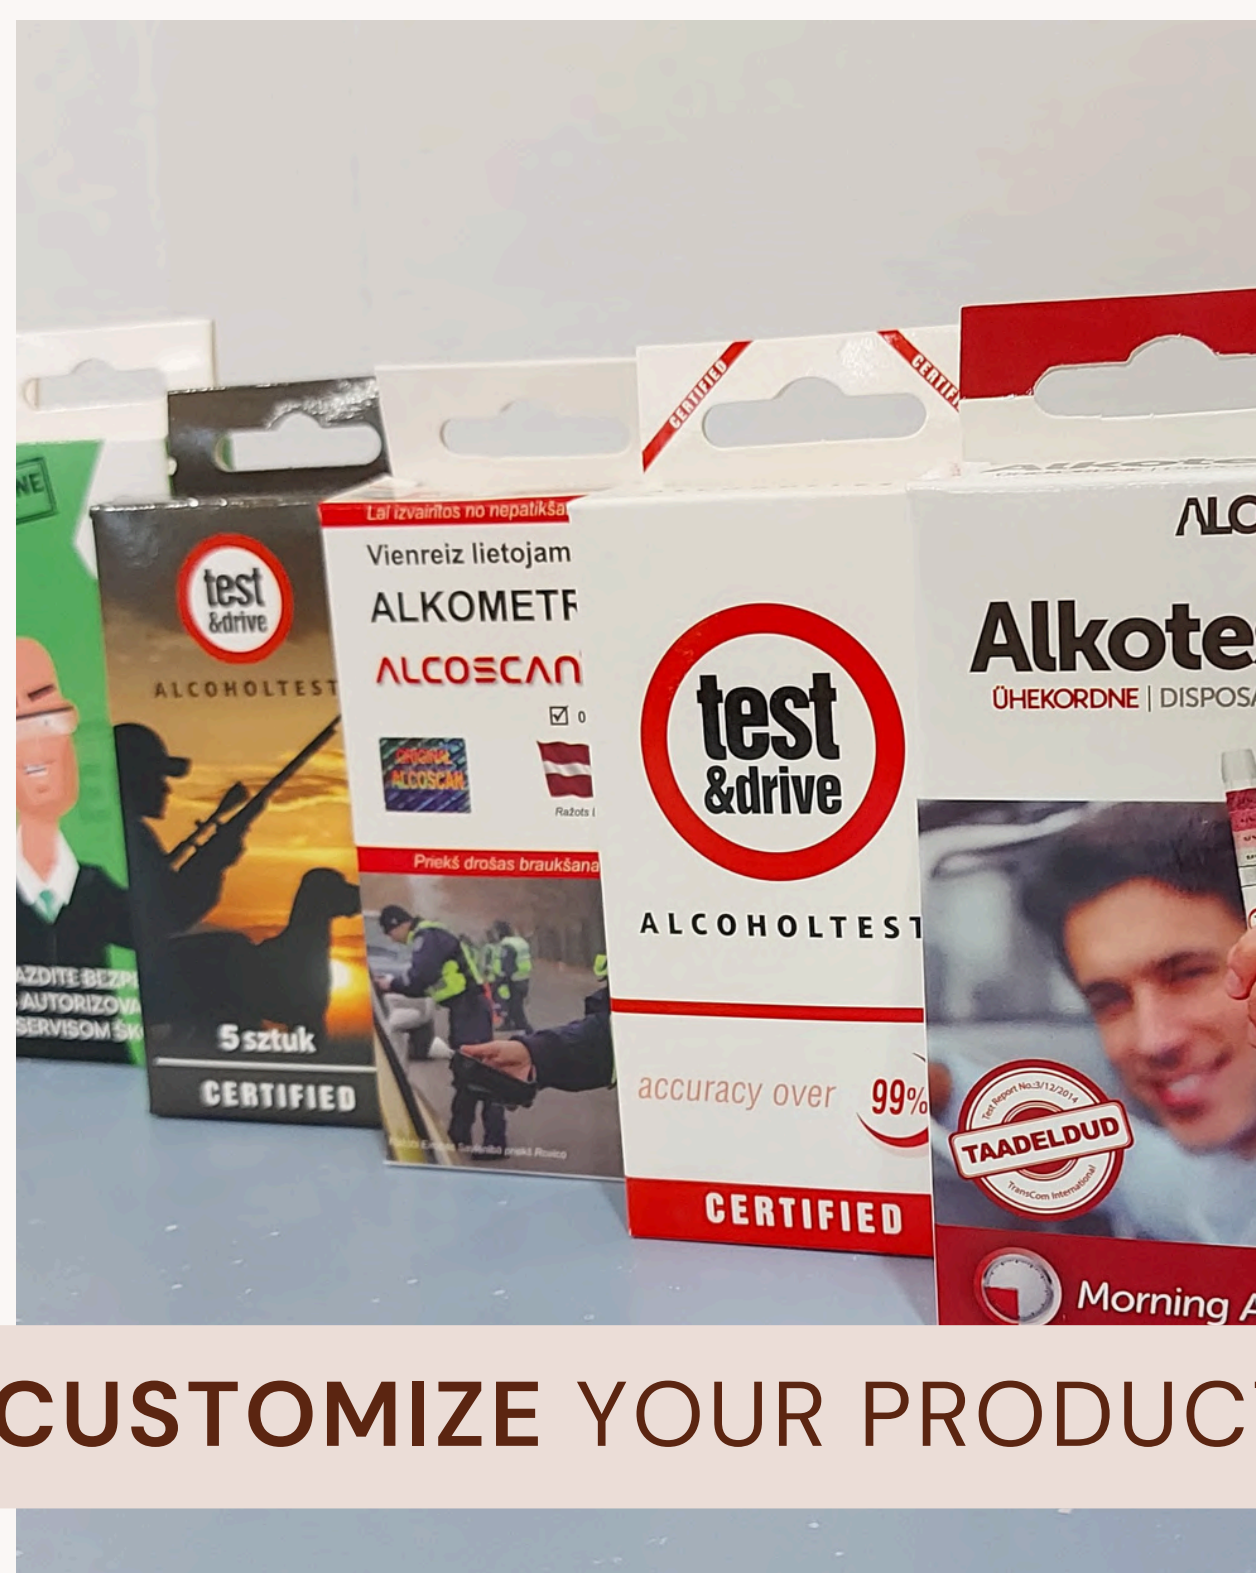

Thanks to this, our products are successfully distributed and sold throughout the country and abroad. Outside Poland, our primary markets are: **USA, Canada, UK, Columbia, Korea, Italy, Spain, Germany, Serbia, Slovakia, Czech Republic, Arabian peninsula, Norway, Portugal, Panama, Romania, Hungary, France, Switzerland, Bulgaria, Israel, Indochina, Brazil, Chile, Mauritius, Lithuania, Latvia, Estonia.**

We are constantly developing our production lines.

Our employees participate in specialist technical, technological, metrological courses and trainings, this improving their knowledge and qualifications.

Laboratory test results

The disposable breath alcohol tests were tested in the Transcom International Measurement Laboratory of Breathalyzers.

- at an alcohol level of 0.2 promille the device showed a test sensitivity of 96%,
- with an alcohol level of 0.5 promille the device has a sensitivity of 98.6%,
- at 0.8 promille the device demonstrates test sensitivity of 100%

Technical data

Disposable breathalyser

- **Technology:** White ReactionsRedox
- **Measuring method:** colour change
- **Measuring colour:** white to red
- **Reading time** 2 min
- **Accuracy:** 0.1 promille
- **Measuring method:** exhaled air
- **Operating temperature:** -25 to 40 degrees Celsius
- **Measurement ranges:** 0.0 0.2 0.5 0.8 (per mille)
- **Device dimensions:** 60mm x 11mm
- **Manufacturer:** Alco2GO, Poland

Our products are certified and meet the criteria of the **French Highway Code NF X 20-702**

Dear Sirs,

Chemical alcohol testers model ALCOTEST have been tested by Calibration Laboratory of Breath Analyzers Transcom International to the Customer's order. The testing was performed in accordance with standards NF X 20-702 June 2007 paragraphs 4.1+ 4.4 and NF X 20-702 October 2014 paragraphs 6.1+6.5.

The measurements have been performed for legal values specified in the highway code according to the standards NF X 20-702.

Sensitivity of chemical alcohol testers ALCOTEST:

No.	The mass concentration of alcohol in exhaled breath [‰]	Sensitivity* [%]	Standards
1	0,2	96	NF X 20-702 June 2007
2	0,5	98,6	NF X 20-702 October 2014
3	0,8	100	NF X 20-702 October 2014

*sensitivity - the ratio of true positives to the sum of true positives and false negatives

The results presented refer only to the tested samples.

Yours sincerely,

Marta Królowska
Quality Manager

Applies to a risk assessment of disposable breathalyzer ALCOTEST

In accordance with REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, a **disposable breathalyzer of the trade name ALCOTEST**, placed on the market by the Test&Drive company, is an article with an integrated mixture. It enables accurate measurement of alcohol content in breath.

In accordance with REGULATION (EC) No 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006, a mixture in the article was classified by the manufacturer and information about risks has been placed in a safety data sheet of that mixture. REACH Regulation imposes the obligation to provide safety data sheets only for chemical substances and mixtures, not for articles.

During normal or reasonable foreseeable conditions of use of that article, there is not intended release substances from the article and these substances are not included on the Candidate List of Substances of Very High Concern for authorization (SVHC included in Annex XIV of REACH Regulation).

Based on the above knowledge, it is considered that the article of trade name ALCOTEST does not pose a risk to the environment.

GHB DETECTORS

We are pleased to introduce two innovative products designed to help enhance personal safety.

GHB Detection Band: A discreet and easy-to-use wristband designed to detect the presence of GHB (Gamma-Hydroxybutyrate) in drinks. Simply apply a drop of the liquid onto the test area, and it will react if the substance is present, providing a quick and reliable safety check.

GHB Detection Card: A compact and convenient card that detects both **GHB and Ketamine** in drinks. Just place a drop of the drink on the designated areas of the card, and results will appear within seconds, alerting you to potential danger.

These products are perfect for individuals looking to protect themselves from drug-facilitated crimes, offering peace of mind and security in public settings. Stay safe with our GHB detection solutions!
